4-jet production in kt-factorization plus parton showers

Wednesday, 5 April 2017 12:40 (20 minutes)

We present an update of the first-ever study of 4-jet production in kt-factorization. We discuss how to supplement it with parton showers using the CASCADE Monte Carlo program and discuss the evidence for the need of contributions from Multi Parton Interactions to properly describe the data over the full phase space.
