APPLfast-NNLO: update on interpolation grids for NNLO

Tuesday, 4 April 2017 12:36 (19 minutes)

The APPLgrid and fastNLO projects provide a fast and flexible way to reproduce the results of perturbative QCD cross section calculations with any input PDF. The latest developments from these projects are presented, concentrating especially on the joint project (APPLfast), providing a common interface to state-of-the-art NNLO QCD calculations from NNLOJET. Additional features from new develoments in the Spectrum tool - a web utility allowing comparison of data with theory calculations - are also discussed.

Primary authors: GWENLAN, Claire (University of Oxford (GB)); SUTTON, Mark (University of Sussex (GB)); RABBERTZ, Klaus (KIT - Karlsruhe Institute of Technology (DE)); BRITZGER, Daniel (Deutsches Elektronen-Synchrotron (DE)); BRITZGER, Daniel (DESY); HUSS, Alexander (ETH Zurich); MORGAN, Thomas (IPPP); CARLI, Tancredi (CERN); STAROVOITOV, Pavel (Ruprecht-Karls-Universitaet Heidelberg (DE))

Presenter: GWENLAN, Claire (University of Oxford (GB))

Session Classification: WG1 Structure Functions and Parton Densities

Track Classification: WG1) Structure Functions and Parton Densities
