

Data Access, Organization, & Management I

- **Track**
 - About 24 people in our track
 - Divided into two groups for discussion purposes
 - Division was arbitrarily random
 - This was problematic and disappointing for vidyo participants
 - Discussions chaired by Andrew Hanushevsky (SLAC) and Bo Jayatilaka (FNAL) and merged at the end
 - Discussion summary posted to the DAOM Google doc

Data Access, Organization, & Management II

- **Scope**

- We agreed that points raised in the Google doc outlined the scope for CWP
 - Productive discussion provided parameters to flesh out the scope.
 - The scope may be trimmed as people contribute
 - Certainly , priorities will be established

Data Access, Organization, & Management III

- Charge

- The chairpersons are to post an elaborated scope based on the group discussion
 - Serves as the template for a future CWP
 - The community is invited to add text to flesh out the Google doc and will serve as the basis the CWP
 - » Initial participants are attendees but anyone in HEP can join the mailing list and add to the document
 - The posting will be completed in February
 - Email to the group mailing list when available

Data Access, Organization, & Management IV

- Process

- All participants add/edit to the document
 - The chairpersons will provide coherence to this process
- Will use group email to nudge the process along
 - May schedule a vidyo meeting if actually needed
- Want to physically meet to get the document into a form that can be made into an actual CWP
 - An extra day added to the HSF Workshop
 - Of the suggested dates 4/10, 4/24, 5/22; logistically only 5/22 really works given people's schedules

Data Access, Organization, & Management V

- Participation
 - An open invitation exists to join group
 - hsf-cwp-data-management@googlegroups.com
 - Joining the group allows full participation
 - We would HSF to publicize this as widely as possible!
