

2nd TCT Workshop

Monday 17 October 2016 - Tuesday 18 October 2016

Jožef Stefan Institute

Scientific Programme

The workshop is dedicated to the exchange of information and experience in TCT. It covers all the aspects of operation: experimental equipment, operational experiences, analysis software and ways to extract different sensor information from measurements, simulation of measurements. A speciality of the workshop is the laboratory exercise part where hands-on experience can be gained. The second workshop has extended the topic also to the most recent findings obtained from TCT measurements on different devices.
