

Blois 2017: 29th Rencontres de Blois on "Particle Physics and Cosmology"

Wednesday, 31 May 2017

Parallel Session Astro+Cosmo (14:00 - 16:00)

-Conveners: Anna Franckowiak

time	[id] title	presenter
14:00	[59] ANTARES highlights and KM3NET/ARCA prospects	NAVAS CONCHA, Sergio
14:20	[60] Astrophysical neutrinos at IceCube, a new window to the Cosmos	RAMEEZ, Mohamed
14:40	[45] Results from ARIANNA	HALLGREN, Allan
15:00	[95] The Very-High-Energy Gamma-ray Sky: Recent Results from VERITAS	PUESCHEL, Elisa
15:20	[48] Results from H.E.S.S.	BRUN, Francois
15:40	[66] Exploring the cosmic middle age with MAGIC	Dr BONNOLI, Giacomo

Parallel Session Astro+Cosmo (16:30 - 19:30)

-Conveners: Fabian Schmidt

time	[id] title	presenter
16:30	[44] The Einstein@Home Gamma-ray Pulsar Survey	CLARK, Colin
16:50	[53] The Pierre Auger Observatory: recent results and prospects	CAZON, Lorenzo
17:10	[49] Gravitational waves from the asymmetric dark matter generating phase transition	BALDES, Iason
17:30	[50] Results and prospects for BICEP3/Keck	KOVAC, John
17:50	[51] Results and prospects from SPTpol and SPT-3G	BENDER, Amy
18:10	[52] Cosmological results from the Kilo Degree Survey	HILDEBRANDT, Hendrik
18:30	[64] High-resolution SZ cartography of clusters of galaxies with the NIKA2 camera at the IRAM 30-m telescope	MAYET, Frédéric
18:50	[65] Neutrinos in Cosmology	DI VALENTINO, Eleonora
