

2017 IEEE Pulsed Power Conference

Monday, 19 June 2017

Poster session I - High Power Microwaves, RF Sources and Antennas - Hall 4 / Cambridge (13:30 - 15:00)

[id] title	presenter	board
[465] 4616V4 Tetrode and Klystron RF Resources for CSNS LINAC	ZHOU, Wenzhong	1
[451] Periodic Structures Manufactured by 3D Printing for Electron Beam Excitation of High Power Microwave Sources	CROSS, Adrian	2
[442] Laser induced plasma for HPM Compressor Switching	Dr COHEN, Jacob	3
[412] 35 kV Inductive Adder for Driving 50 Ω with Fast Rise Time	Mr CARSCADDEN, John	4
[399] Compact Marx Generator and High Power Microwave System	BARNETT, David	5
[46] High Power Soliton Generation Using Hybrid Nonlinear Transmission lines	Dr SILVA NETO, Lauro Paulo	7
[51] Improved secondary windings for the Tesla transformer	Prof. SMITH, Ivor	8
[52] Magnetic Coupling in Tesla transformers	Prof. SMITH, Ivor	9
[63] High-Power RF Source for the Pulsed Fields Excitation in the Ground	TKACH, Yaroslav	10
[64] High-Current Test Stand for HPM Sources Testing Based on the Marx Generator	TKACH, Yaroslav	11
[67] Planar removable high voltage Vivaldi antenna	Dr DIOT, Jean-Christophe	12
[190] Experimental investigation of relativistic backward-wave oscillators operating in phase-induced regime	Dr ROSTOV, Vladislav	13
[210] Phase control in a klystron-like relativistic backward wave oscillator operating at low guiding magnetic field with 10 kW input signal	Dr XIAO, Renzhen	14
[211] An all circular waveguide four-way power combiner with ultra high power capacity and high combination efficiency	Dr XIAO, Renzhen	15
[219] DEVELOPMENT AND TEST OF A COMPACT PFN MARX FOR 100 PPS REPETITIVE OPERATION AT 400 kV – 85 ns – 5 ns RISE TIME ON A 100 Ohm LOAD	TOURY, Martial	16
[258] EFFECTS OF PULSE SHAPES ON AXIAL VIRTUAL CATHODE OSCILLATOR	Mr KIM, Se-Hoon	17
[259] Analysis on Design Parameters of Plasma Limiter for Protecting against High Power Electromagnetic Pulse	CHO, Young-Maan	18
[261] Results of an S-band Sheet Beam Klystron Development Effort	PERKINS, Michael	19
[263] A Test Stand used to Evaluate a Prototype S-band Sheet Beam Klystron	PERKINS, Michael	20
[264] Multi-point Ignition Process in Methane-air Mixtures by Pulsed Microwave Power	Mr LIU, Cheng	21
[277] PARTICLE-IN-CELL CODE INVESTIGATION OF MAGNETIC FIELD EFFECT ON AXIAL VIRCATOR	Dr CHUNG, Shen Shou Max	22
[297] The Design Energy Saving Device for RF System at Taiwan Photon Source.	CHUNG, Fu-Tsai	23
[315] Emitter Residual Gas Effects in a High Power Microwave System	ÅBERG, Denny	24

[345] Experimental Studies on Cathode Material Dependence of Microwave Power in Axially-Extracted Vircator with Resonance Cavity	Mr TERAMAE, Motohiro	25
[381] Modification of Townsend Breakdown Theory for investigating the High-Power Microwave Propagation in the Atmosphere	QIAN, Bao-Liang	27
