

Enabling Grids for E-science

Welcome

Francesco Giacomini

*JRA1 All Hands Meeting
Nicosia, 6-7 May 2009*

www.eu-egee.org

- **Purpose of this meeting**
- **Deliverables and Milestones**
- **Periodic Report**

- **Understand where we are**
- **Prepare for EGI already in year II of EGEE-III**
 - Re-organization
 - Clusters of competence → product teams
 - Impact on the way we work
 - Workplan
- **The agenda for this meeting is flexible**
 - Today mainly internal discussion in JRA1
 - But SA3 representatives are expected to contribute
 - Tomorrow joint discussion with SA3
 - Main topic: interface between a product team and central team
 - Guest star: Steven Newhouse (technical director)

- **Current status**
 - Platform portability
 - IPv6
 - Availability of documentation
 - Availability of interfaces
 - Error messages and logging
- **Roadmap until the end of the project in terms of releases**
- **Best practices in development/testing/release to share with others**
- **Ideas for the future**
 - A call for new EU projects is about to open

- **DJRA1.1**

- *Report on Middleware Service Engineering and plans for the second year*
- <https://edms.cern.ch/document/993401>
- Currently under review

- **MJRA1.3.2**

- *Update of Functional Description of Grid Components and associated Work Plan*
- It will mainly contain a dump of the *release* entries of the Savannah workplan, with target dates
 - roadmap

- **A sort of year-long QR**
 - Due next Monday
 - I'll ask information offline if I need
