

## Day 2

*Oliver Keeble*  
*Cyprus SA3 AH*

- **Make sure everyone understands the new direction**
  - This is the beginning of the transition process
- **Report work**
- **Ask questions**
  - Give feedback
- **Reinforce contacts**
  - Learn from one another
  - We will be moving work around the activity this year

- **Produce SL5/x86\_64 release for all components**
- **Certify gLite Authorisation Service**
- **Glue2 deployment**
- **SCAS deployment**
- **Complete LRMS integration in CREAM**
  - Begin obsolescence of the lcg-CE
- **Provide decent gLite source**
  - Essential to promote community involvement
- **Sort out MPI support**
  - New HEP use cases for multi-core jobs
- **Manage updates for and during LHC production**
  - We may have last-minute updates before October
  - Deployment of non-essential change will stop on LCG infrastructure after October
- **All while we define & implement a new process**

- **STEP 09**
  - Coordinated work by experiments
  - June
- **LHC**
  - Final magnet lowered into tunnel last week
    - 37 magnets replaced
  - Beam in September
  - Collisions in October
  - Run through to autumn next year
  - Lots of cosmics in the meantime

- **Finish Periodic Report**
  - Send your contributions!
- **MSA3.5.2 – update on deployment guide (PM18)**
- **MSA3.4.2 – update on software lifecycle process (PM20)**
  - This will be defined and implemented much earlier
- **Plus some reviews of milestones etc**

- **An Institute doesn't have to have a 'product' to join the gLite consortium and become part of a 'product team'.**
- **Initial membership is open to any institute currently in JRA1 or SA3**
  - And will not necessarily be limited

- “The review panel concludes that the project has been **outstandingly successful**, both in its individual activities and in its project management”
- 22. SA3. Build on and expand the test coverage achieved in EGEE-II through the development of **regression test suites** and increased use of test **automation**.
- 25 SA3. Continue the EGEE-II practice of increasing the **distribution of the testing activities to partners** with thorough central coordination and greater co-location of developers and testers.

- **EGEE Review**
  - End of June
- **EGEE09 in Barcelona**
  - (21-25th September 2009)
  - <http://egee09.eu-egee.org/>
  - Registration opens on 8<sup>th</sup> May
  - Discussing with JRA1 what we can to profit most
- **Final all hands**
  - CERN
  - Most likely there will still be 9 months to go at that point
