

SA3 All-Hands Meeting Cyprus '09

Christian Neissner

Institut de Física d'Altes Energies

Barcelona

problems:

- re-organisation @ IFAE/PIC
- change of staff

certification

CONDOR integration

- **Main focus**
 - **Tier-1**
 - **transition from EGEE to (undefined) role within Spanish EGI**
 - **including new (local) experiments**

- **EGEE:**
 - **SWE ROC**
 - **5½ FTE**
 - **SA3: ½ FTE**

- **EGEE:**

- ☹ **SWE ROC: Kai left PIC**

- ☹ **I will leave SA3**

- 😊 **SA3 tasks will be covered by
Marc Rodriguez**

- 😐 **I'll have to take Kai's EGEE responsibilities**

some work done on that:

- **patch #2874:**
 - **bdii version 5**
 - **effected a lot of node types**
 - **done for those present @ IFAE**

- **Task #9190:**
 - **yaim core for bdii and vbox**

not so many news on that:

- **CONDOR on cream-CE:**
 - seems to work well
 - patch not yet prepared

- **CONDOR on lcg-CE:**
 - broken due to bugs in condor.pm (GLOBUS)
 - fixes are applied in the testbed @ IFAE
 - patch not yet prepared

Fixes for both will go to the same patch.

**We don't exactly know what role PIC/IFAE will play in
NGI/EGI.**

installation of YAIM 4.0.0 on parts of the PPS cluster:

- **lcg-CE: ce03.pic.es**
- **glite-WMS+LB: rb02.pic.es**

tests:

- **run test during certification of patch #1281:
found a bug in the info provider
→ patch #1363**

waiting for releases:

- lcg-CE on SL4
- cream-CE (“pre-release” version would be welcome)
- WMS 3.1

improve the communication to CERN CONDOR:

- test of their BLAH scripts in our testbed
