

- **Partner Name:**
 - IFIC (CSIC)
 - Located in Valencia, Spain
 - EGEE and Tier-2 for ATLAS experiment

- **Persons involved: 8 PM**
 - Alvaro Fernandez
 - Gabriel Amoros

- **TSA3.2 - Certification Testbed and stress testing.**
 - WMPROXY components in previous project
 - Lately, patch certification and internal review of document.

- **EGI/NGI and Future**

- **task #8558: Internal review of MSA3.5.1**
 - MSA3.5.1 deployment guide
 - As we are partner with SA1 experience
 - Provided some changes and recommendations that were adopted by authors to produce final document

- **task #9121: certification of patch #2778 and #2780 on fetch-crl**
 - **patch #2778: fetch-crl update**
 - **patch #2780: fetch-crl update x86_64**
 - **No big issues found, review bugs are solved and works as expected**
 - **Provided recommendations for release notes**
 - **In Pre-production now**
 - **Recently open bug#49587 (user documentation not readable)**
 - **New release produced (should we review patch again?)**

- **Members of NGI through the Spanish e-Science network (<http://www.e-ciencia.es/>)**
- **IFIC is member of Infrastructure, Middleware and Applications areas**
- **Member of the Middleware Panel.**
- **Specific issues in MW for Spain:**
 - Products developed that will be supported (GridWay, Crossbroker, others)
 - Co-existence of gLite and globus-4 infrastructures
 - Efforts are devoted to interoperation

- **Expertise and Future:**
 - **WMS** and **WMPROXY** testing and debugging
 - Testsuites **development. Regression Testing Framework**
 - Involved in several parts of package release (certification → PPS → Production)
 - **Patch** certification
 - Document review
 - Knowledge of other components:
 - **SRM (Storm)** : testing, small developments, in production now
 - **VOMS**: tested, in production serving **Fusion vo + regional swe vos**
 - NGI interoperation
