

Title: Introduction to CERN Computing Services

Lecturer: Dr Bernd Panzer-Steindel

Date and Times:

- 1st July at 11:15

Summary of the proposed talk:

Introduction to CERN Computing Services.

The IT department is responsible for a variety of basic services and large computing resource installations. The talk will describe these services and how they are interconnected. The focus is on the details about the data flow and processing facilities for the LHC experiments physics data.

**Biography-
Brief CV:**

- PhD in high energy physics in 1989
- Moved to computing in 1992
- Main working areas: introduction of Linux PC cluster into IT, design and architecture of large storage and processing clusters,
- Management of large scale data flow tests in preparation for LHC running

Since 2007 CTO (Chief Technology Officer) and resource manager in IT
