

Top quark mass: what is it and should it be?

Wednesday, 10 May 2017 16:15 (30 minutes)

Review on what are we measuring with the top quark mass (MC mass), how it is related to theory (pole mass, \overline{MS} mass), and how we could strengthen the link between theory and experiment when experimental precision reaches 0.2 GeV.

Presenter: HOANG, Andre (University of Vienna)

Session Classification: Day 1
