

Physics highlight: rainbow of jets

Thursday 11 May 2017 17:15 (20 minutes)

CMS has already measured cross sections of inclusive jets and inclusive b-jets. What tools would be needed take to push this forward at 100 fb-1 and also measure inclusive gluon jets, inclusive light quark jets, inclusive charm jets and inclusive top jets, to have full view of flavor universality at the TeV scale?

Presenter: EREN, Engin (Deutsches Elektronen-Synchrotron (DE))

Session Classification: Day 2
