THOR project: establishing better links between article and data

Friday 2 December 2016 17:00 (20 minutes)

THOR is a 30 month project funded by the European Commission under the Horizon 2020 programme. It will establish seamless integration between articles, data, and researchers across the research lifecycle. This will create a wealth of open resources and foster a sustainable international e-infrastructure. The result will be reduced duplication, economies of scale, richer research services, and opportunities for innovation.

Summary

Presenter: Ms LAVASA, Artemis (CERN)

Session Classification: Préservation et de cycle de vie des données scientifiques
