To be able to login to CERN Neutrino Cluster you have to:

1. **Create a user account at CERN**: this link http://cenf.web.cern.ch/basic/registration-procedure might be useful. If you have questions please ask Audrey Deidda email: Audrey.Deidda@cern ch.
2. Please, contact neutplatform.support@cern.ch for the user account in CERN Neutrino Cluster.

/eos/neutplatform/experiments/protoDUNE/mcpro is a place where we are going to

store Monte Carlo production. To have an access you need to be a member of the e-group CENF-General so please go to https://e-groups.cern.ch/e-groups/EgroupsSearchForm.do
After you subscribe to the e-group CENF-General change the Primary Group to CENF-General using link: https://resources.web.cern.ch/resources/Manage/Linux/Settings.aspx.

Part of MCC7 which will be used during LArSoft tutorial is available on CERN Neutrino Cluster:
```
>ssh username@neut.cern.ch
```
In dual phase far detector geometry:
```
/mnt/nas00/software/protoDUNE_June_ws/newsamples/prod_piminus_2.0
GeV_isotropic_dune10kt_dphase
```
Or in single phase protoDUNE geometry:
```
/mnt/nas00/software/protoDUNE_June_ws/newsamples/gen_protoDune_pi
on_2GeV_mono
/mnt/nas00/software/protoDUNE_June_ws/newsamples/gen_protoDune_el
ectron_2GeV_mono
```

If you have any questions related to the computing please contact
neutplatform.support@cern.ch
