Once you logout after setting up the development area, you login again and need to do following setups:

Set up UPS:

**source /cvmfs/dune.opensciencegrid.org/products/dune/setup_dune.sh**

**source /cvmfs/fermilab.opensciencegrid.org/products/larsoft/setups**

Set up the basic tools and environment variables that are needed

**setup mrb**

**export MRB_PROJECT=larsoft**

**cd larsoft_mydev**

**source localProducts_XXXX/setup**

**mrbslp**

Texts and instructions were based on the information from:

https://cdcvs.fnal.gov/redmine/projects/dunetpc/wiki/_Tutorial_ - please refer to this if you want to have more extend description.
