

Dear Joana, could you please implement these two minor corrections and then upload the revised version. Best, the SQM2017 LOC — The paper reads well. Thanks for all updates. A two minor things from introductions need correction:

5th line strigent – > stringent

→ .. *stringent* ..

third line from the end: .. of the K^-/K^+ ratio measured in heavy targets like ... not in targets ! but in reactions with heavy targets – > ...of the K^-/K^+ ratio measured in collisions with heavy targets like ... With these two corrections implemented I sign off.

.. *of the K^-/K^+ ratio measured in collisions with heavy targets like ..*

With these two corrections implemented I sign off
