

Discussion on Common Tracking Forum

by Frank Gaede, Markus Elsing

- idea was ground up initiative to develop tracking tools
- first ACTS releases exit, with repository + build system
 - ➔ see talk by Andi, some talks mentioned they develop against it already
- what are the next steps to make more codes available ?
 - ➔ detector independent ...
 - ➔ building/integration, against ACTS and/or standalone ?
 - ➔ who is interested ? how shall we go about it ?
