Direct and resonant reaction studies for nuclear astrophysics at HIE-ISOLDE

Tuesday, 6 December 2016 14:05 (25 minutes)

.The capabilities of HIE-ISOLDE are well matched to a broad range of experimental nuclear astrophysics studies. In this talk I will review recent works relevant to x-ray bursts and core collapse supernovae, and will present some of the proposals in these and other areas presently awaiting beam time.
