

Underlying Event Measurements at the CMS

Monday, 26 June 2017 16:40 (20 minutes)

Measurement of Underlying Event activity performed using proton-proton collision data collected by the CMS detector will be presented. To check the energy dependence of Underlying Event activity, the results are compared with previous measurements from different experiments at different center-of-mass energies.

Speakers

Primary authors: GUPTA, Rajat (Panjab University (IN)); BANSAL, Sunil (Panjab University (IN)); KUMAR, Ramandeep (Panjab University (IN)); Ms MEHTA, Ankita (Panjab University (IN)); SINGH, Jasbir (Panjab University (IN))

Presenter: GUPTA, Rajat (Panjab University (IN))

Session Classification: Soft QCD and Soft Diffraction
