

## Turnaround and precycle: analysis and improvements

*Tuesday 13 December 2016 11:40 (15 minutes)*

This talk will present data of turnaround times during the previous run, give some insights in the distribution and try to spot different bottlenecks. The impact of the turnaround time on the optimal fill length will be shown and different contributing factors to the turnaround itself will be discussed. The final goal is to identify areas of improvements and give concrete proposals, based on data presented.

**Presenter:** FUCHSBERGER, Kajetan
