

New results from $Y(4260)$ decays at BESIII

Tuesday, 26 September 2017 15:15 (20 minutes)

The BESIII Experiment at the Beijing Electron Positron Collider (BEPC2) has accumulated the world's largest samples of e^+e^- collisions in the tau-charm region. Based on these data samples, some new results from the $Y(4260)$ decays will be shown.
