

# Spectroscopy of charm baryons at LHCb

*Friday 29 September 2017 09:45 (20 minutes)*

LHCb continues to expand its world-leading sample of charmed hadrons collected during LHC's Run 1 (2010-2012) and Run 2 (2015- present). With this data set, LHCb is discovering many previously unobserved charmed states and making the most precise determinations of the properties of known states. LHCb's latest work on the spectroscopy of charmed hadrons is presented.
