Pile up mitigation in CMS jets and MET objects

Thursday, July 20, 2017 10:00 AM (20 minutes)

We present tools developed by CMS for LHC Run II designed for pileup mitigation in the context of jets, MET, lepton isolation, and substructure tagging variables. Pileup mitigation techniques of “Pileup per particle ID” (PUPPI), and pileup jet identification are presented in detail along with the validation in data.

Presenters: VESTERBACKA, Leonora (Eidgenoessische Technische Hochschule Zuerich (CH)); VESTERBACKA, Minna Leonora (ETH Zürich)
