

Session Program

26-28 May 2009

4th CLIC Advisory Committee (CLIC-ACE)

Feasibility Item 3+4: 2 beam acceleration, RF phase stability, energy and intensity stability

CERN, 354/1-001

Tuesday 26 May

14:00

Feasibility Item 3+4: 2 beam acceleration, RF phase stability, energy and intensity stability

Session | Location: CERN, 354/1-001

14:00-14:30

Drive beam generation problematics; summary of all relevant issues - theory

Speaker

Bernard Jeanneret

14:30-15:00

CLIC Drive beam RF system including phase and intensity stabilisation systems

Speaker

Dr Erk Jensen

15:00-15:30

TBL experimental program, status and results

Speaker

Steffen Doebert

15:30-16:00

Coffee break

16:00-16:30

CTF3 status and experimental program: what can be expected by 2010 and possible improvement afterwards

Speaker

Frank Tecker

16:30
