## Portorož 2017: New physics at the junction of flavor and collider phenomenology

Contribution ID: 67 Type: Plenary talk

## Theoretical Uncertainties in Proton Lifetime Estimates

Friday 21 April 2017 10:09 (23 minutes)

We shall briefly recapitulate the main sources of theoretical uncertainties plaguing proton decay calculations in classical GUTs and advocate a particular GUT scenario in which a reasonably robust proton lifetime estimate may be accessible.
