

Data Technologies L1: Setting the scene: Storage technologies

Wednesday 30 August 2017 09:00 (1 hour)

The lecture presents the various Storage Models, and the supporting management techniques including Name Servers and interfaces for Data Management.

Storage Reliability and performance

The lecture will also discuss the various solution to ensure long data preservation and reliability with the consequences on performance, including when using Peer to Peer Storage and data transfers.

Summary

Presenter: PACE, Alberto (CERN)

Track Classification: Data Technologies
