

CERN coming

closer to the Baltics

**Computing and Technology Workshop,
Vilnius, 13–14 December 2016**

The challenges related to the ambitious goals and the edge-of-technology equipment at CERN offer immense field for the creativity of researchers and engineers involved. A group of specialists from CERN are coming to Vilnius for sharing their ideas on the future developments. Researchers and students from Lithuania will present and discuss their own involvement in CERN programmes. Remote participation for guests from the Baltics and Finland provided as an option.

No participation fees.
