

# **PaaS for web applications as key to the evolution of CERN Web Services**

*Tuesday 10 July 2018 16:40 (20 minutes)*

Following the deployment of OpenShift Origin by the CERN Web Frameworks team in 2016, this Platform-as-a-Service “PaaS” solution oriented for web applications has become rapidly a key component of the CERN Web Services infrastructure. We will present the evolution of the PaaS service since its introduction, detailed usage trends and statistics, its integration with other CERN services and the present and future use as main backend for a wide range of Web framework applications and infrastructure components.

**Primary authors:** LOSSENT, Alexandre (CERN); RODRIGUEZ PEON, Alberto (CERN); WAGNER, Andreas (CERN)

**Presenter:** WAGNER, Andreas (CERN)

**Session Classification:** Posters

**Track Classification:** Track 7 –Clouds, virtualization and containers
