

BESIII Data Management System

Thursday, 12 July 2018 11:45 (15 minutes)

BES III experiment have taked data more than ten years, about fifty thousand runs have been taken. So how to manage these large data is a big challenge to us. For years, we have created an efficient and complete data management system, including MySQL database, C++ API, BookKeeping system, monitor applications and etc. I will focus on introduce BESIII central database management system's structure, workflow; BookKeeping system's workflow and the importance of monitor applications.
