

Student presentations

Jose Maria Benlloch Rodriguez, *IFIC (CSIC – University of Valencia), Spain*

The nature of neutrinos and the NEXT experiment

Mykhailo Dalchenko, *Texas A&M University, USA*

Data acquisition system on gas-electron multiplier muon detectors

Christina Quast, *CERN*

Speeding up C++ code for fun and profit

Georgios Voulgarakis, *CERN*

Autopilot for Linac4 H-Ion Source

Victoria Tokareva, *Joint Institute for Nuclear Research, Russia*

Parallel partial wave analysis for the BES-III experiment

Nikola Hardi, *CERN*

Evolutionary code optimisation

Michela Paganini, *Yale University, USA*

Simulating EM Calorimeter Showers with Generative Adversarial Networks

Flavio Pisani, *INFN and University of Bologna, Italy*

Interconnection networks simulations for computing systems

Tea Marasovic, *University of Split, Croatia*

Early days of computer games
