CTA: the tape backend for EOS

Friday, 3 February 2017 11:10 (20 minutes)

The CERN Tape Archive (CTA) will provide EOS instances with a tape backend. It inherits from the CASTOR's tape system, but will provide a new request queuing system which will allow more efficient tape resource utilization.

In this presentation we will present CTA's architecture and the project's status.

Primary authors: BAHYL, Vlado (CERN); CANCIO MELIA, German (CERN); CANO, Eric (CERN); MURRAY, Steven (CERN); LEDUC, Julien (CERN); KOTLYAR, Victor (Institute for High Energy Physics (RU))

Presenter: CANO, Eric (CERN)

Session Classification: EOS Workshop
