### Welcome to the AIS web site!

Your unique entry point to all computer-based Administrative Information Services at CERN provided by GS Department

#### FOCUS

#### AIS: the unique entry point to all administrative computing at CERN

The AIS website provides you with links, documentation, Frequently Asked Questions pages, Quick Reference Guides etc on all administrative applications and projects at CERN.

Choose one of the menu items on the left. If you are not sure on which option to use, the shortcuts on the right may help you finding the good one.

#### SHORTCUTS

- Get an exhaustive list of our [applications](#)
- Find out which application is yours with our [businessmap](#)
- Discover the [projects](#) and [new procedures](#) we are working on
- Browse our extensive [Site map](#)
- Otherwise search the AIS web site:
- Find out what [our mandate](#) is
- Discover [AIS people](#) and [AIS services and applications](#)

lurodrig 4:32 PM  
hello there, I have a REST API and I want to develop a web ui for it. Any framework recommendation? preferably In java. My first though was for spring-mvc + angularjs on top, any opinions?

Igoralcz 6:05 PM  
Hi Luis, I was using AngularJS - It's pretty hard to learn but once you get it creating web applications is pretty fast. They're about to release new version which is not backwards compatible.

lurodrig 6:05 PM  
Thanks Lukasz!

Igoralcz 6:06 PM  
Commented on lurodrig's message: **hello there, I have a REST API and I want to develop a web ui for it. Any framework recommendation? preferably in java. My first though was for spring-...**  
You can use it with bootstrap or Angular Material. It's MVP so making changes is clean an relatively easy. What I didn't like was that I had to create tons of short files (I tried to follow some guidelines).

lurodrig 6:06 PM  
Yes, it looks like the learning curve is a bit hard and that I need to setup several bits and pieces in my environment before to start

lurodrig 6:07 PM  
BTW did you ever try <https://github.com/damienpontifex/TypescriptAngular2CodeGen?>

jlunadur 6:07 PM  
If you have already a REST interface to attach your ui to... why you need any specific backend technology?

Igoralcz 6:08 PM  
Commented on lurodrig's message: **hello there, I have a REST API and I want to develop a web ui for it. Any framework recommendation? preferably in java. My first though was for spring-...**  
One advantage of it is that you can write easily test for it.  
To setup JS libraries it would be good to setup bower or something similar, but I didn't dig into that.
