# WebPLUS

What is is

- Very early POC

- Remote terminals, in your browser
- Isolation, via containers
- Flexibility, your personal lxplus

How it works

docker run / rm / os

Web Browser

Webplus App

Docker Swarm

Docker Nodes

Demo

What is missing

- Half day work
- Auth/AuthZ, SSO?
- Shared storage (writeable)
- Definitely many other pieces of lxplus

Interested?

- Code will be pushed next week
- ricardo.rocha@cern.ch
