Jet reconstruction and heavy jet tagging at LHCb

Tuesday, March 21, 2017 9:05 AM (30 minutes)

The jet reconstruction and the heavy jet flavour tagging at LHCb will be discussed with focus on the last published measurements such as the measurement of forward $t\bar{t}$, $W+bb$ and $W+cc$ production in pp collisions at $\sqrt{s}=8$ TeV and the search for the SM Higgs boson decaying in $b\bar{b}\gamma$ or $c\bar{c}\gamma$ in association to W or Z boson.

Presenter: SESTINI, Lorenzo (Universita e INFN, Padova (IT))

Session Classification: Identification and Tagging Mini-Workshop
