Centralising Elasticsearch

Thursday, 27 April 2017 14:30 (25 minutes)

In January 2016 CERN launched a new project with the aim to provide a centralised Elasticsearch service.
This presentation will summarise the status of the project,
challenges, experiences from the pre-production phase, and methods applied to configure access control.

Length of talk (minutes)

20

Scheduling constraints / preferences

Better avoid Friday due to flight contraints
