

AMORE & QA

Status report

Barthélémy von Haller
CERN PH/AID

AMORE & QA : Reminder

- AliRoot QA can be used in AMORE
 - Avoid code duplication between offline and online
- Two possibilities :
 - A generic agent to publish all QA histograms
 - Custom agents to use QA histograms

Generic QA agent

- Depending on the name of the agent, it loads and uses the related XXXQADataMakerRec class in libXXXRec.so
- Status :
 - Ready for AliRoot v4.17
 - Species : agent publishes all the histograms of all species.
 - Loads extra libraries if needed : configuration file to specify which and when to load them
- Detectors using it (5) : ACORDE, EMCal, FMD, PHOS and T0

QA custom modules

- QA used directly in the AMORE agents
- Benefits
 - Publish only a subset of the QA histograms
 - Add extra information to the histograms
 - Create new objects based on the QA output
- Drawback
 - Module to be implemented
- Detectors using this approach (5) : muon_trk, SDD, SSD, TPC and V0

QA modules : status table

Only the detectors that use the QA are listed here. The others develop their own AMORE modules without using the QA.

	A C O R D E	QA agents			T O	M U O N - T R K	Custom QA Agents			
		M C A I	F M D	P H O S			S D D	S S D	T P C	V O
Code under development or developed (number of Modules)					1	1	1	1-2	2	1
Code in SVN										
Estimation of needs		~	~						~	
Validation/statistics gathering requested										
Test file(s) available										
Proper info.db.txt file										
Proper rpm.spec file										
Validation passed										
Statistics collected (Hz on dqm node, worst case or most realistic case)			22		>1k		5		1	
RPM released and installed at Point 2 (version deployed)							1.1	1.0	1.0	
Test at point 2 (number of agents)							1			
Agent is completed, prod. Ready										

Logbook & AMORE

- Access to the Monitor Objects from outside CERN
- Access to the archives, possibility to make them permanent

AMORE Agent 'amoreAgentTST01' Overview for run 6963

General

Detector: TST
Version:
Monitor Objects:
Versions:
Size: 0.0 KB
Last Updated: 22/06/2009 11:48:40

Runtime Parameters

```
amoreAgent -a amoreAgentTST00 -e 100 -r --s
run57581.raw -u -p ALICE_DUMMY
Configuration file :
# example of config file
# This is the number of monitor objects of
each type (8 types)
numberOfHistos 128
#13
# The number of beans of the mohif plots
number0
```
