

Dear,

I am pleased to submit for your consideration the press kit of Blazing Quasi-Stellar Object by Luca Pozzi, a show taking place at CERN (Genève, Switzerland) in the glorious Auditorium where the first detection of the Higgs boson was announced to the world. This rare occasion has been made possible thanks to the Fermi LAT Collaboration Meeting, INFN - Italian Institute for Nuclear Physics and NASA - National Aeronautics and Space Administration.

Please find at this link the press release and the selection of images (a checklist is included): <https://www.dropbox.com/sh/wv7ld3lgrqh199x/AACBY-UtYD2ehES1X6lFk76ta?dl=0>
