

CLIC Two-Beam Module Review

Tuesday, September 15, 2009 - Wednesday, September 16, 2009

CERN

Scientific Program

The program is divided in the following sessions:

Introduction (Charge to CDR and module overview)

Requirements from beam physics and RF structures

Technical system design: baseline and possible alternatives

Integration (technical systems in the module and module in the tunnel)

Validation (mock-ups before CDR and test modules in CLEX after CDR)

Cost issues

Conclusions and future actions
