

The 9th workshop in a serie

# Excited QCD 2017

Sintra, Lisbon, Portugal

7-13 May 2017

## QCD at high temperatures & finite densities

- heavy-ion collisions, jets, diffraction, hadronisation
- quark-gluon plasma
- holography, colour-glass condensate
- compact stars, applications to astrophysics
- QCD phase diagram from the lattice and other theoretical advancements

## QCD at low energies

- excited hadrons
- new resonances
- glue-balls, multi-quarks

## More information

## Organising Committee

Pedro Bicudo, IST, Lisbon

Nuno Cardoso, IST, Lisbon

Jelena Jovicevic, TRIUMF

Robert Kaminski, INP PAS, Krakow

Marina Krstic Marinkovic, CERN
