

Excited QCD 2017

Monday 8 May 2017

Monday Afternoon (20min talks + 10min discussions) (17:00 - 20:00)

-Conveners: Leticia Palhares

time	[id] title	presenter
17:00	[116] The Topological Susceptibility via the Gribov horizon?	FELIX, Caroline
17:30	[131] Decays of light mesons triggered by chiral chemical potential	Prof. ANDRIANOV, Aleksandr
18:00	Break	
18:30	[140] Hadron properties from nPI: towards first principles results	Dr WILLIAMS, Richard
19:00	[171] The structure of light baryons and tetraquarks	Dr EICHMANN, Gernot
19:30	[124] The analytic properties of the Landau gauge quark propagator Dyson-Schwinger equation at rainbow level	WINDISCH, Andreas
