

# Excited QCD 2017

## Tuesday 9 May 2017

### Tuesday Morning (20min talks + 10min discussions) (08:30 - 12:00)

-Conveners: Marina Marinkovic

time	[id] title	presenter
08:30	[158] Monte Carlo calculations using the holomorphic gradient flow	ALEXANDRU, Andrei
09:00	[144] A new theoretical method for lattice QCD calculations at finite density beyond the sign problem	SUGANUMA, Hideo
09:30	[145] Lattice Landau gauge gluon propagator at finite temperature: non-zero Matsubara frequencies and spectral densities	SILVA, Paulo
10:00	[166] Center Vortices and Topological Charge	HÖLLWIESER, Roman
10:30	Break	
11:00	[137] Chern-Simons 5-form and Holographic Baryons	SUGIMOTO, Shigeki
11:30	[170] The Quark propagator in QCD and QCD-like theories	CONTANT, Romain
