

Container deployment WG

- Extension of work done by Traceability WG
- Start with Singularity
 - Focusing on deployment aspects and how experiments should use it / not use it
 - Advise sites on appropriate setup (CVMFS caches, etc)
- Potentially expand to provide site a minimal number of recipe(s) for container deployment for inter-VO separation
 - HTCondor docker universe, Mesos, etc
- Planning pre-GDB on July 11th to start on these
