

Lepton Number Violation and Muon-to-Positron Conversion

KEVIN KELLY

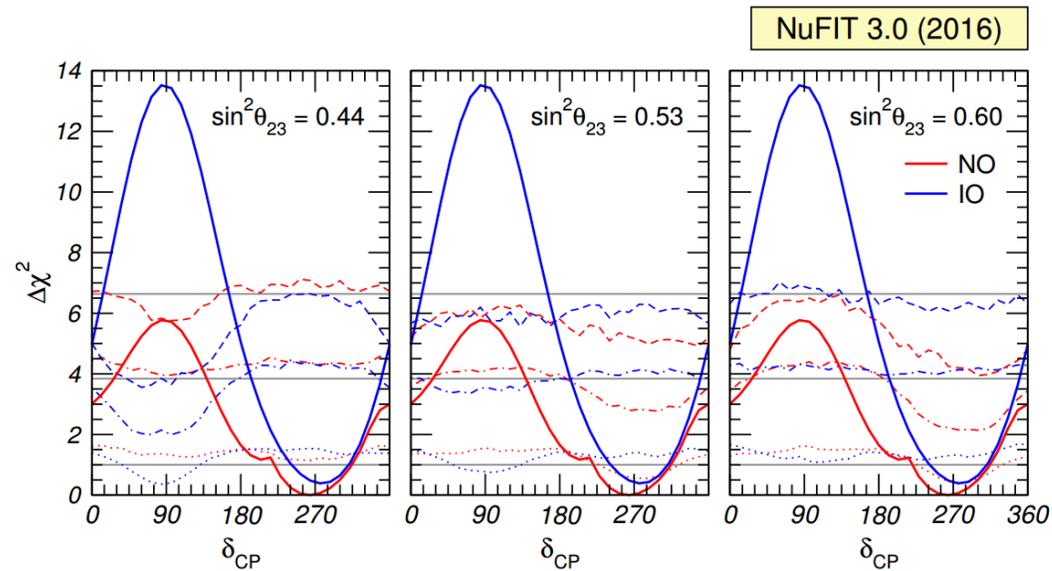

NORTHWESTERN UNIVERSITY

BASED ON [1611.00032] WITH J. BERRYMAN, A. DE GOUVÊA, A. KOBACH

Neutrinos have Mass!

Neutrinos have Mass!

- ▶ There's still *plenty* to determine about Neutrinos:
 - ▶ CP-violation

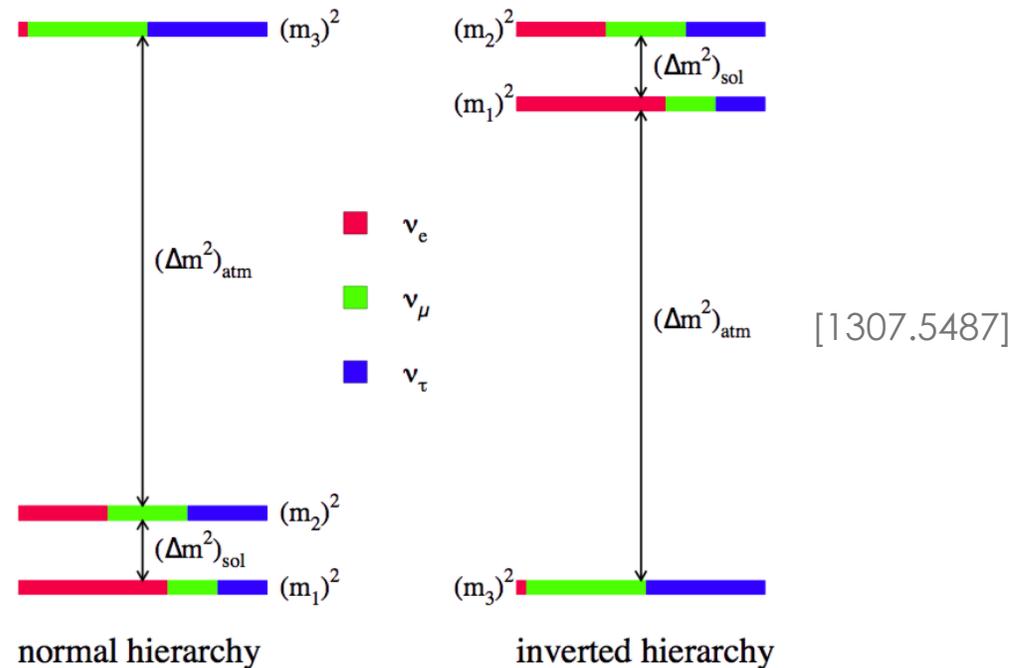

[1611.01514]

Neutrinos have Mass!

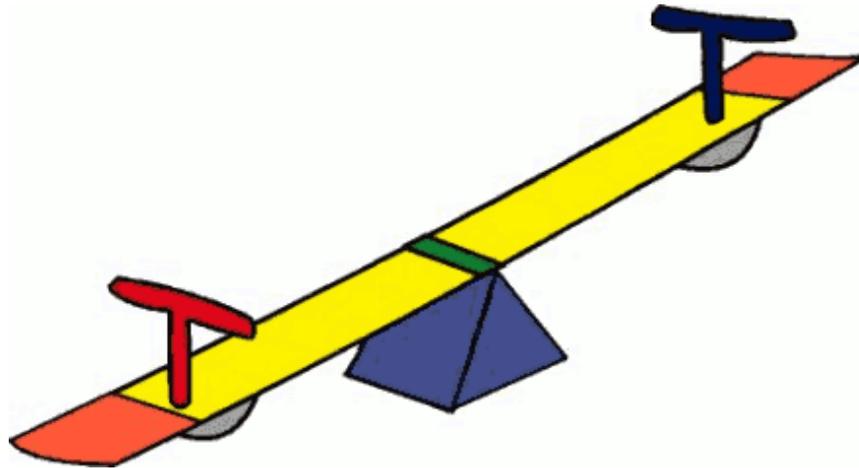

► There's still *plenty* to determine about Neutrinos:

- CP-violation
- Mass Hierarchy

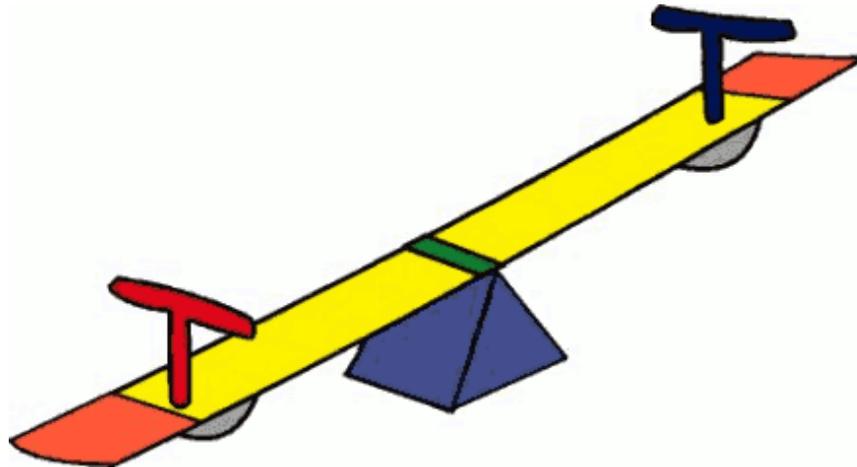

Neutrinos have Mass!

- ▶ There's still *plenty* to determine about Neutrinos:
 - ▶ CP-violation
 - ▶ Mass Hierarchy
 - ▶ **Mass Mechanism**

Neutrinos have Mass!

- ▶ There's still *plenty* to determine about Neutrinos:
 - ▶ CP-violation
 - ▶ Mass Hierarchy
 - ▶ **Mass Mechanism**

- ▶ Goal: study lepton-number-violating processes to probe the nature of neutrino masses

LNV Operators and Neutrino Mass

LNV Operators and Neutrino Mass

- ▶ If any LNV process occurs in nature, then neutrino masses are (at least partially) Majorana in nature. [PRD25, 774 (1982)]

LVN Operators and Neutrino Mass

- ▶ If any LVN process occurs in nature, then neutrino masses are (at least partially) Majorana in nature. [PRD25, 774 (1982)]
- ▶ Majorana neutrino masses require odd-dimension effective operators [1604.05726].

LNV Operators and Neutrino Mass

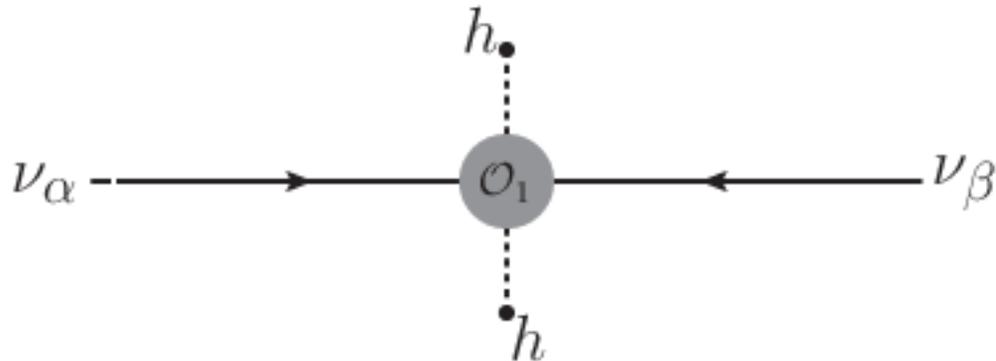

- ▶ If any LNV process occurs in nature, then neutrino masses are (at least partially) Majorana in nature. [PRD25, 774 (1982)]
- ▶ Majorana neutrino masses require odd-dimension effective operators [1604.05726].

$$\mathcal{O}_1 = \frac{g_{\alpha\beta}}{\Lambda} (L_\alpha H) (L_\beta H)$$

LNV Operators and Neutrino Mass

- ▶ If any LNV process occurs in nature, then neutrino masses are (at least partially) Majorana in nature. [PRD25, 774 (1982)]
- ▶ Majorana neutrino masses require odd-dimension effective operators [1604.05726].

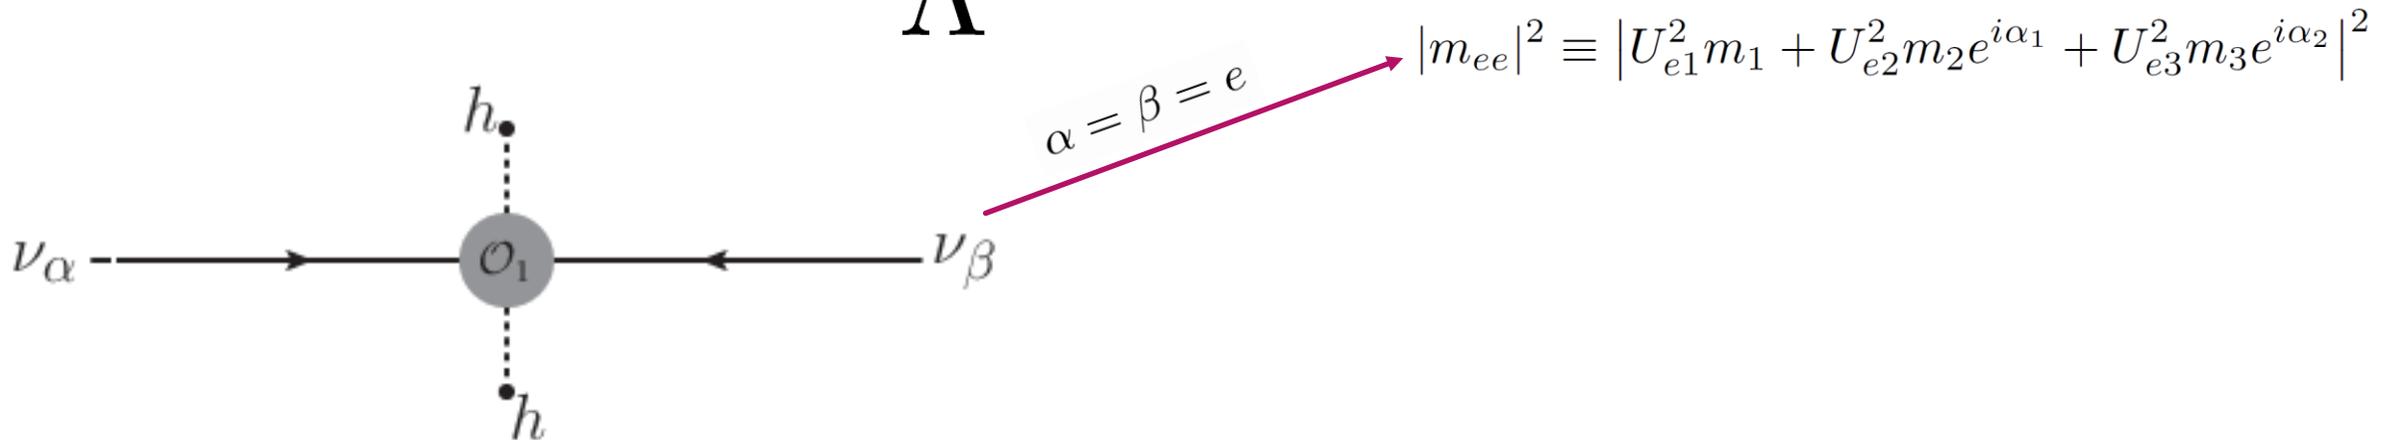

$$\mathcal{O}_1 = \frac{g_{\alpha\beta}}{\Lambda} (L_\alpha H) (L_\beta H)$$

- ▶ Majorana neutrino masses require odd-dimension effective operators [1604.05726].

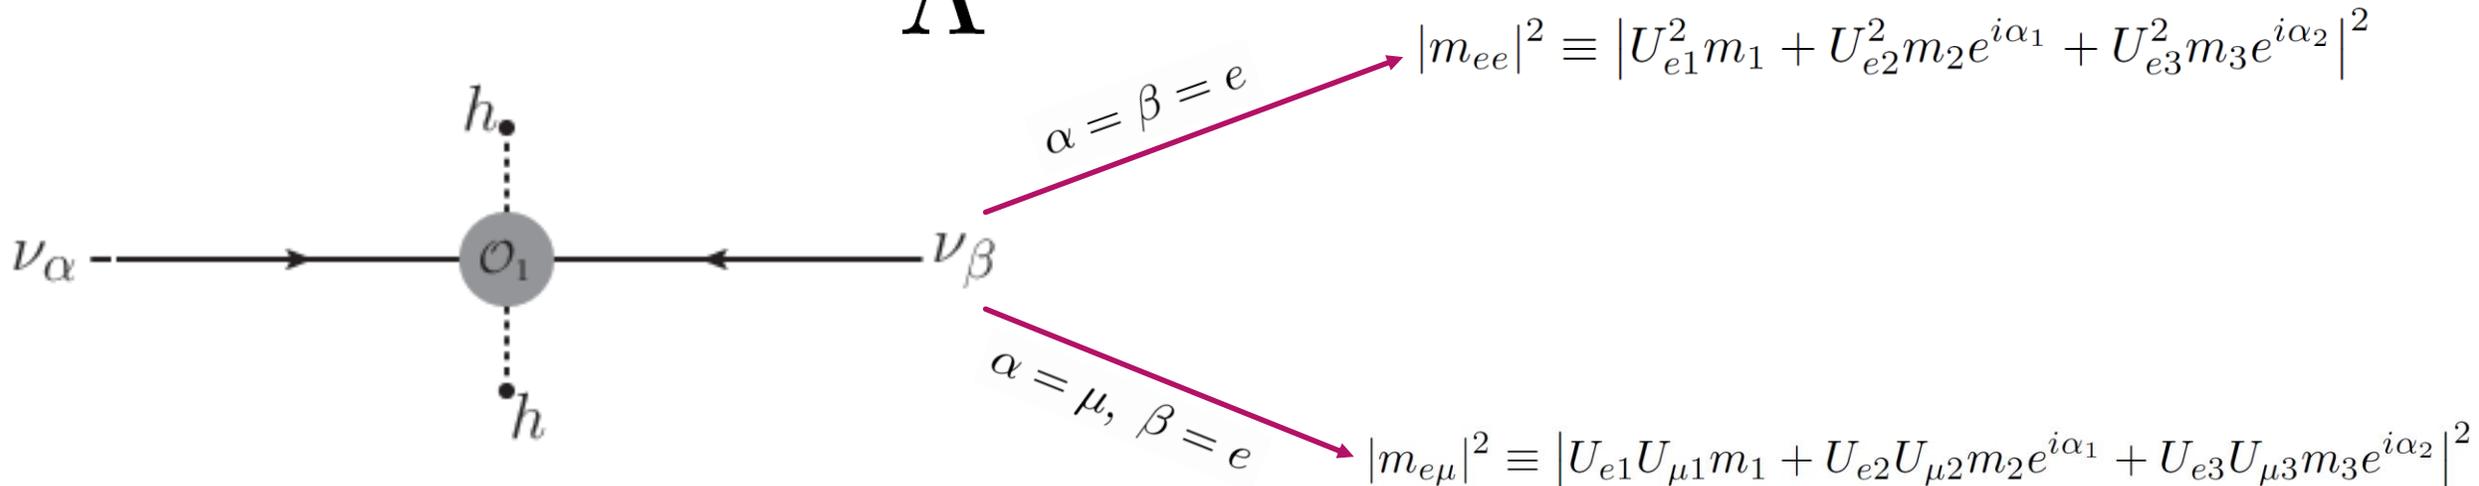

$$\mathcal{O}_1 = \frac{g_{\alpha\beta}}{\Lambda} (L_\alpha H) (L_\beta H)$$

$$|m_{ee}|^2 \equiv |U_{e1}^2 m_1 + U_{e2}^2 m_2 e^{i\alpha_1} + U_{e3}^2 m_3 e^{i\alpha_2}|^2$$

$$m_{\alpha\beta} = \frac{g_{\alpha\beta} v^2}{\Lambda}$$

$$|m_{e\mu}|^2 \equiv |U_{e1} U_{\mu 1} m_1 + U_{e2} U_{\mu 2} m_2 e^{i\alpha_1} + U_{e3} U_{\mu 3} m_3 e^{i\alpha_2}|^2$$

High-dimension example: Operator 14b

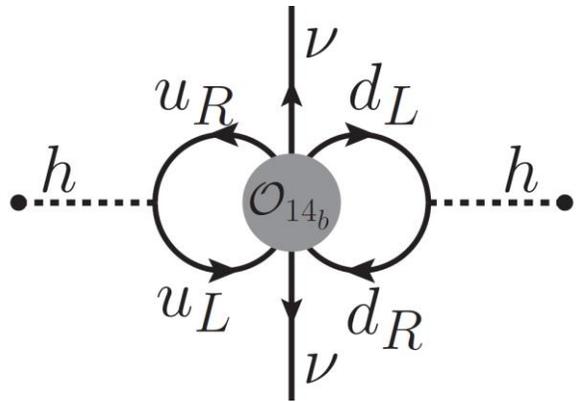

$$\mathcal{O}_{14b} = \frac{g_{\alpha\beta}}{\Lambda^5} (L_{\alpha} \overline{Q}) (L_{\beta} Q) \overline{u^c} d^c$$

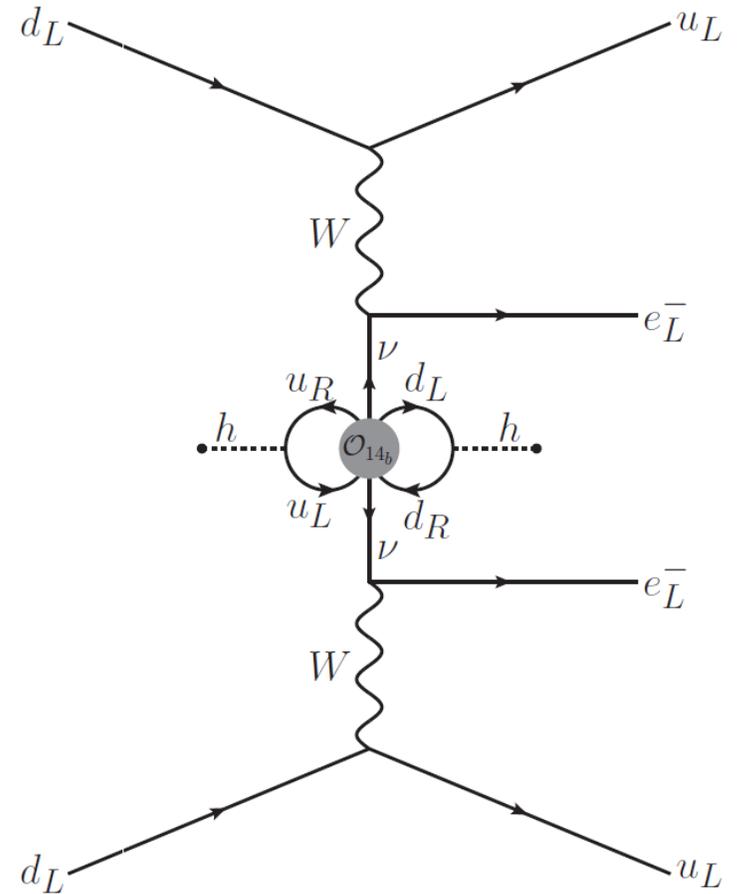

$$m_{\alpha\beta} = \frac{y_t y_b v^2}{(16\pi^2)^2 \Lambda}$$

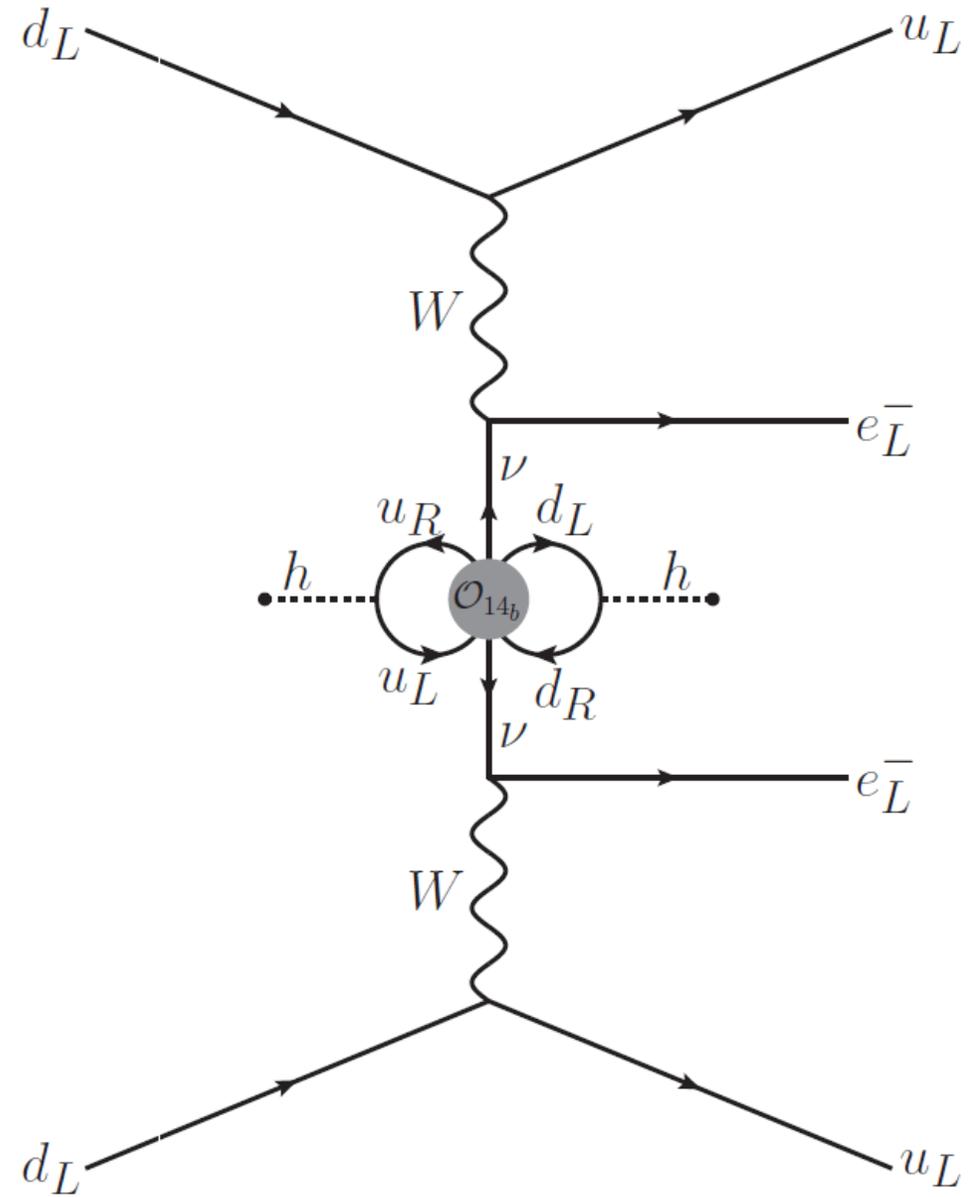

High-dimension example: Operator 14b

$$\mathcal{O}_{14b} = \frac{g_{\alpha\beta}}{\Lambda^5} (L_\alpha \bar{Q}) (L_\beta Q) \bar{u}^c d^c$$

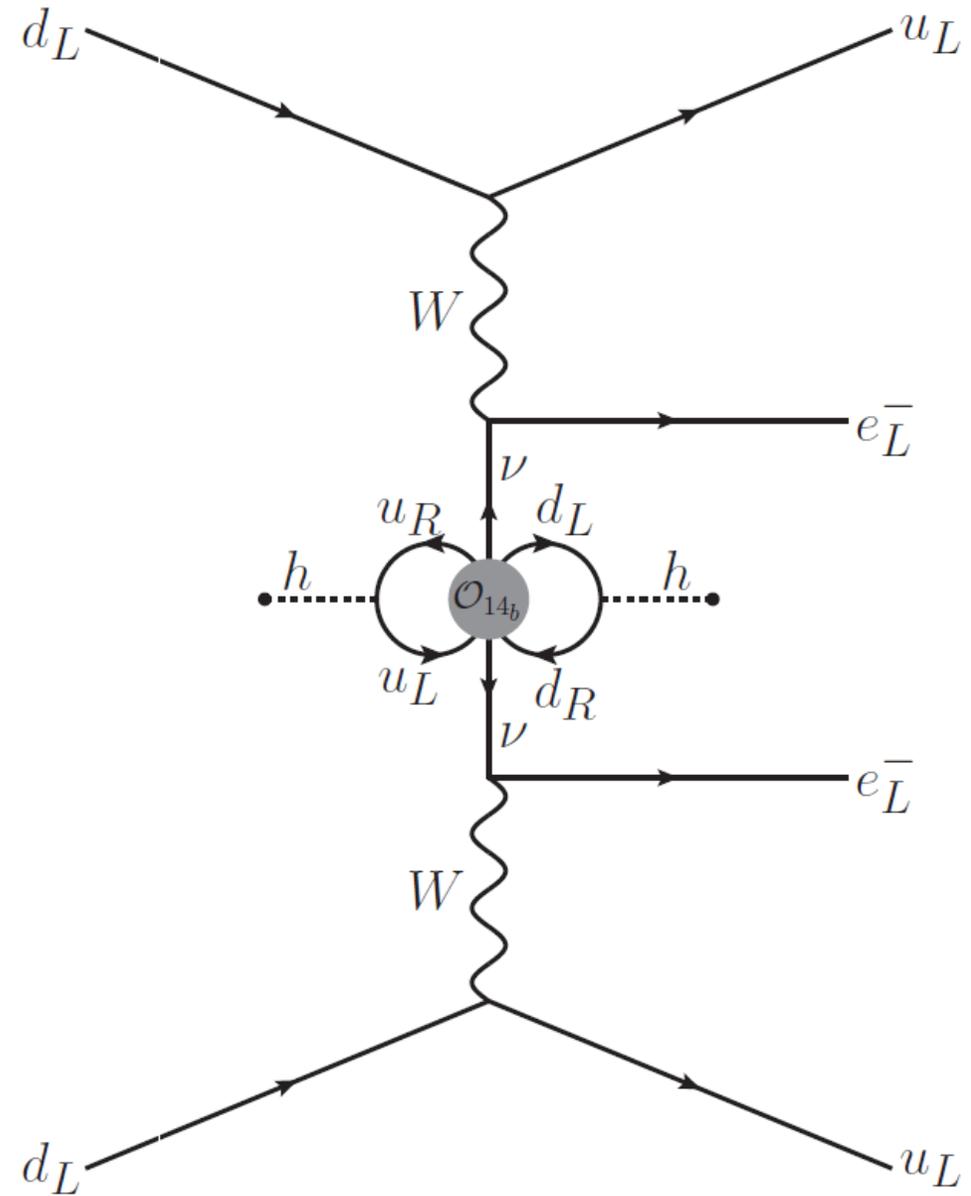

$$m_{\alpha\beta} = \frac{y_t y_b v^2}{(16\pi^2)^2 \Lambda}$$

Contribution of this diagram to double-beta decay rate:

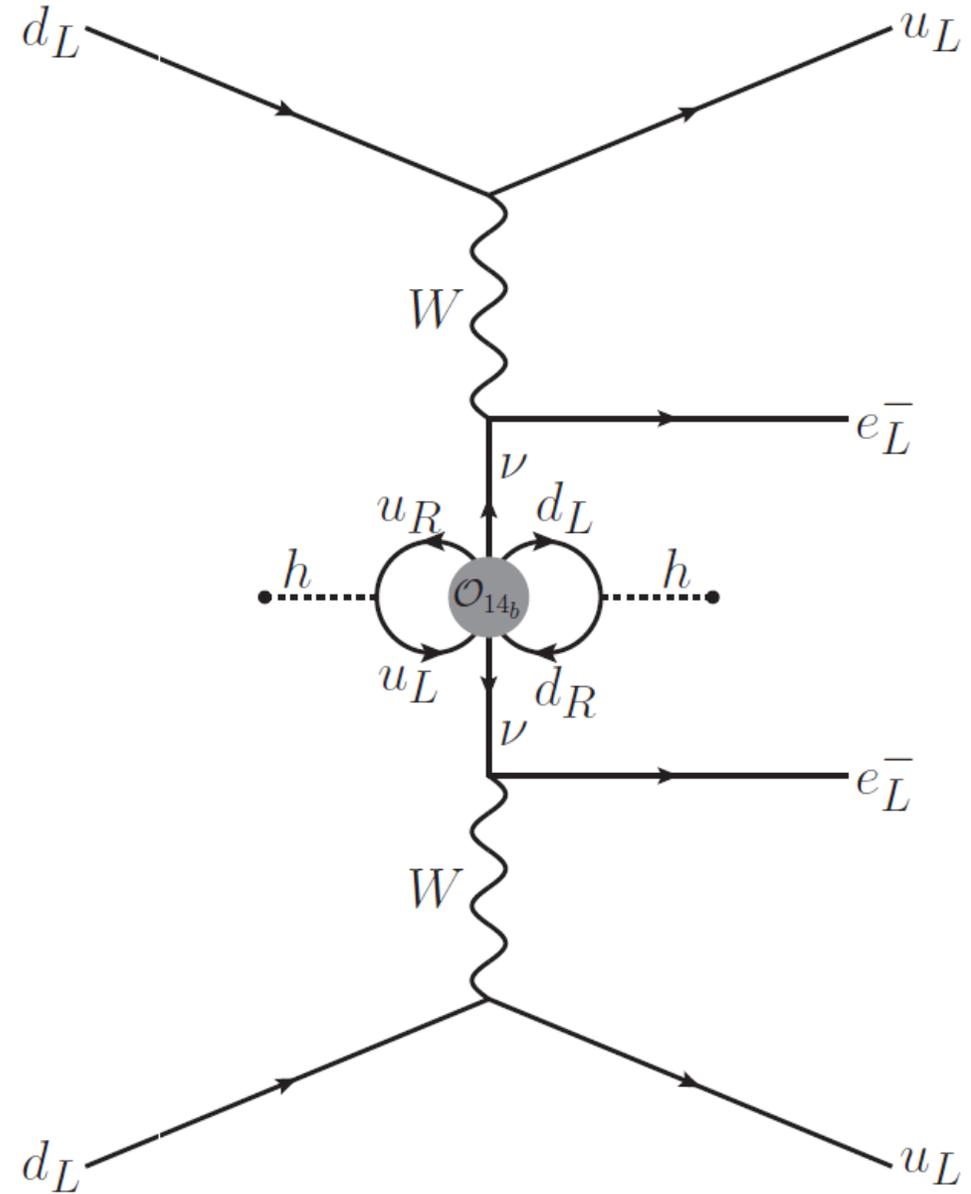

- Dimension-9 Operator: $\left(\frac{1}{\Lambda^5}\right)^2$

Contribution of this diagram to double-beta decay rate:

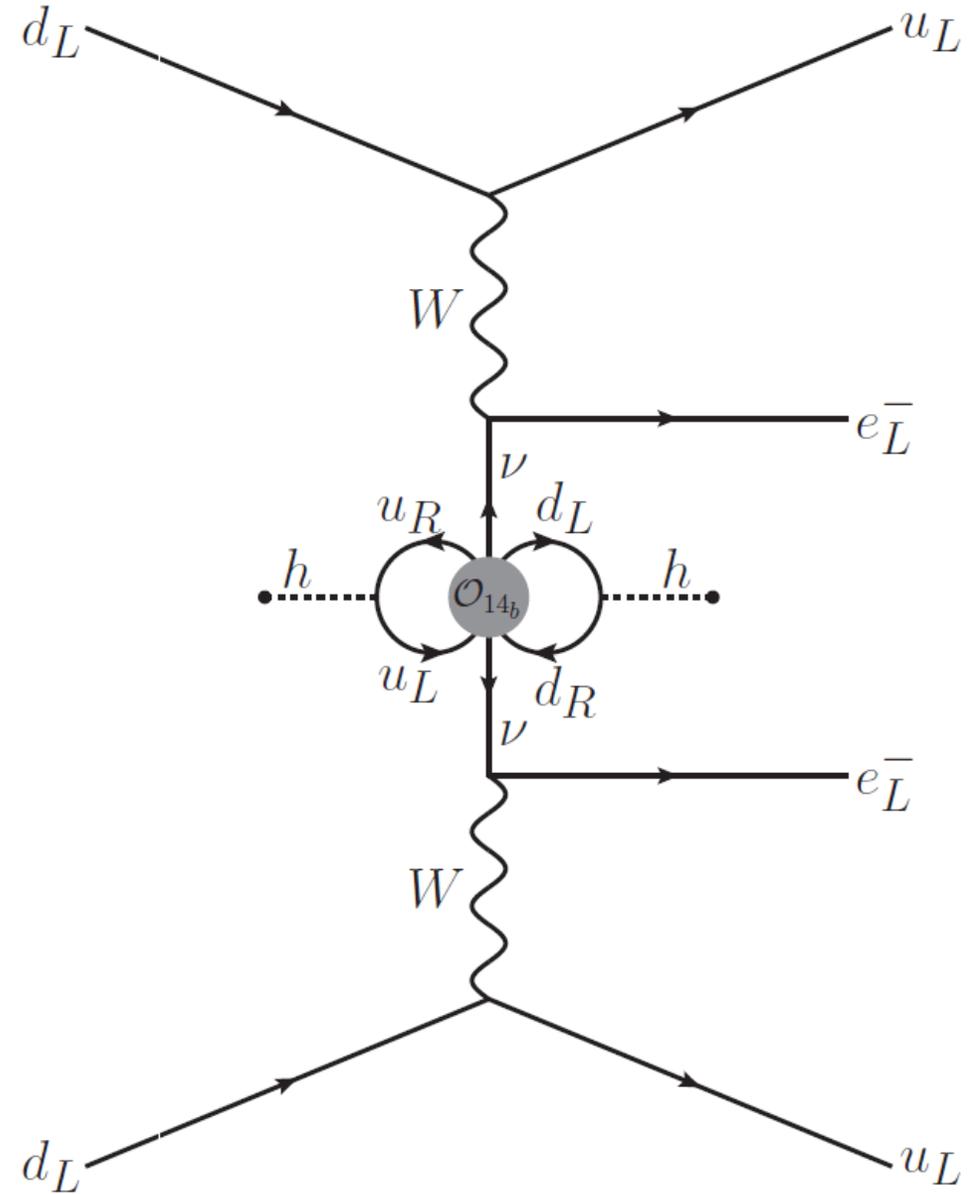

- Dimension-9 Operator: $\left(\frac{1}{\Lambda^5}\right)^2$

- 2 W-propagators: $\left(\frac{G_F}{\sqrt{2}}\right)^4$

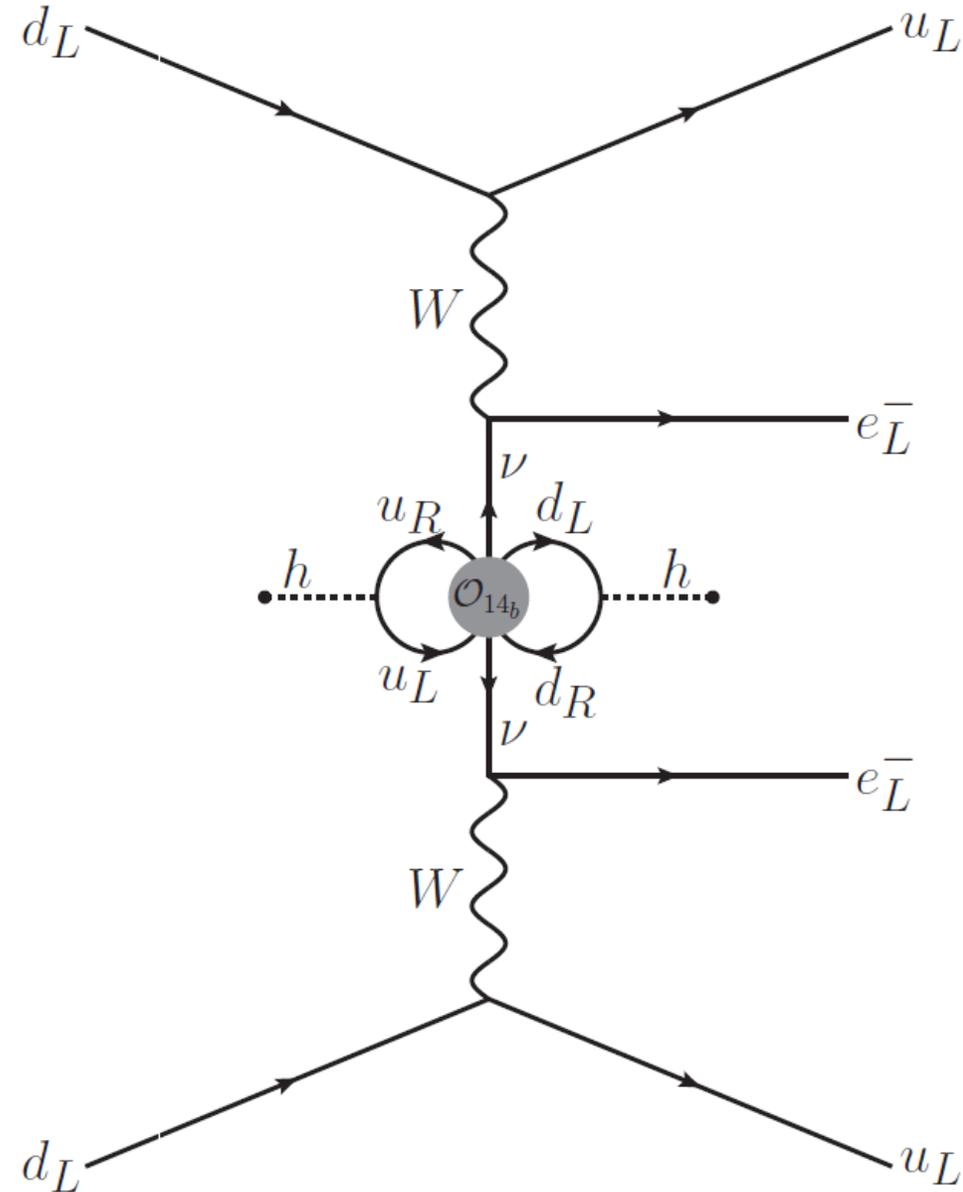

Contribution of this diagram to double-beta decay rate:

- Dimension-9 Operator: $\left(\frac{1}{\Lambda^5}\right)^2$
- 2 W-propagators: $\left(\frac{G_F}{\sqrt{2}}\right)^4$
- Neutrino propagators: $\left(\frac{1}{q^2}\right)^2$

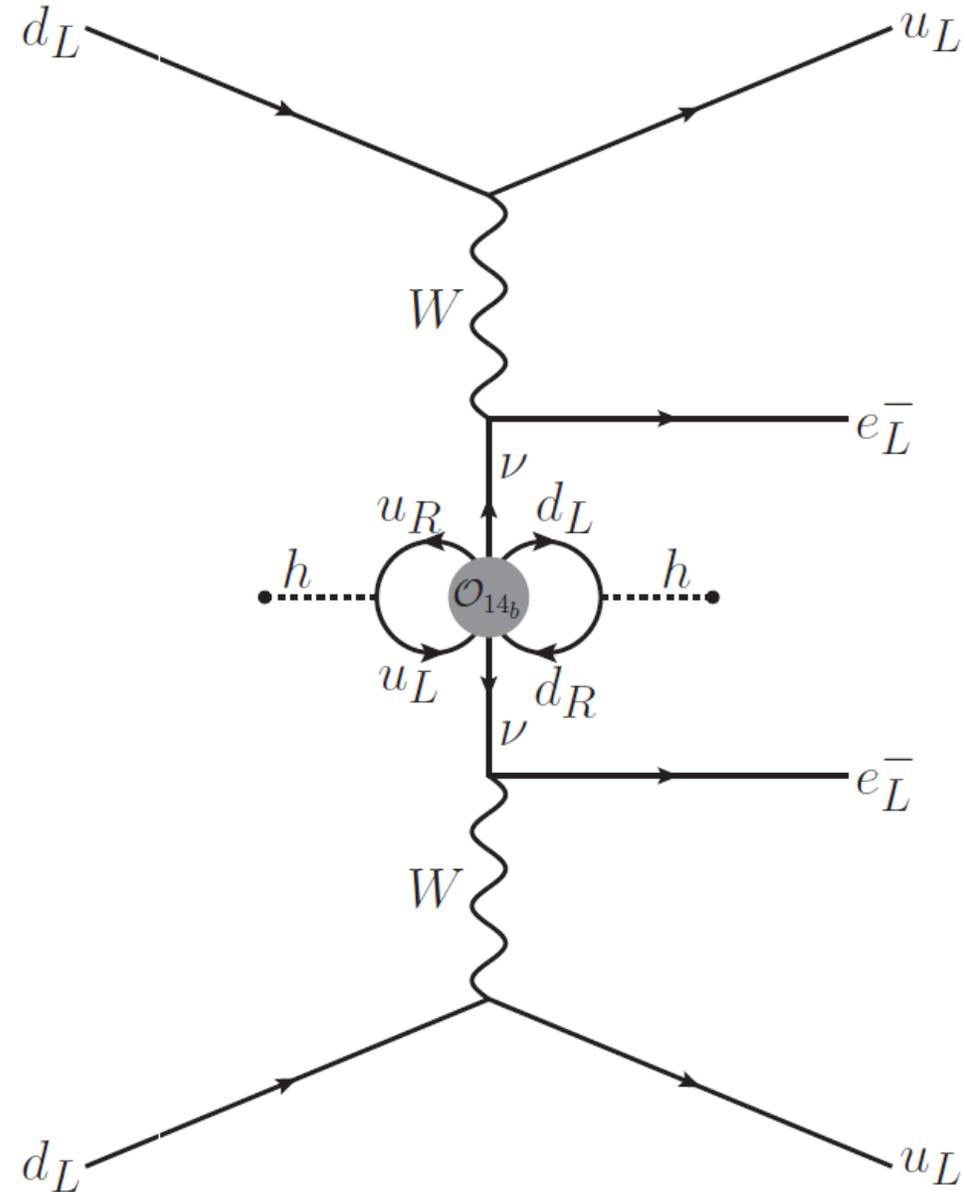

Contribution of this diagram to double-beta decay rate:

- Dimension-9 Operator: $\left(\frac{1}{\Lambda^5}\right)^2$
- 2 W-propagators: $\left(\frac{G_F}{\sqrt{2}}\right)^4$
- Neutrino propagators: $\left(\frac{1}{q^2}\right)^2$
- Two quark* Yukawa interactions: $(y_t y_b)^2$

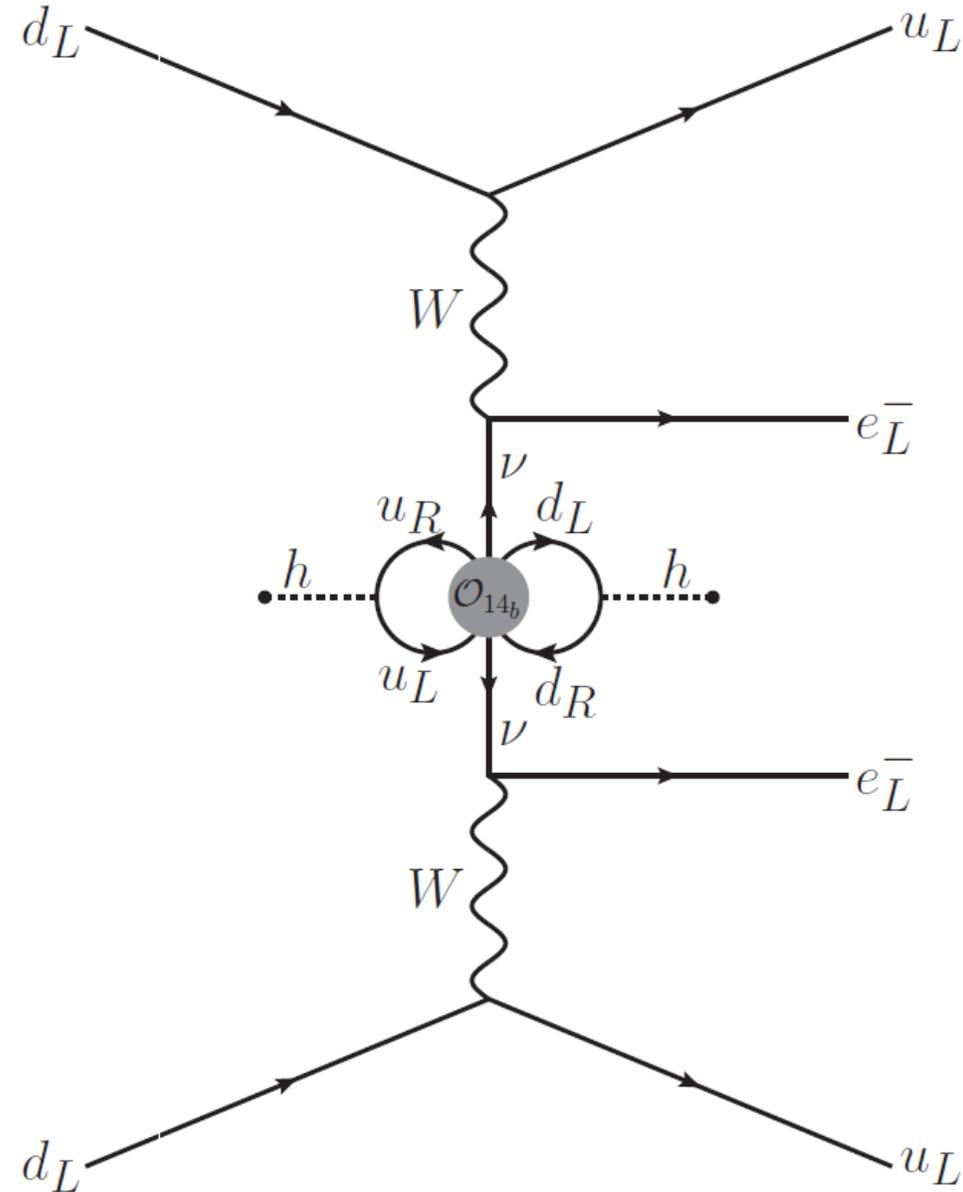

Contribution of this diagram to double-beta decay rate:

- Dimension-9 Operator: $\left(\frac{1}{\Lambda^5}\right)^2$
- 2 W-propagators: $\left(\frac{G_F}{\sqrt{2}}\right)^4$
- Neutrino propagators: $\left(\frac{1}{q^2}\right)^2$
- Two quark* Yukawa interactions: $(y_t y_b)^2$
- Two Higgs bosons acquiring their vev: $(v^2)^2$

Contribution of this diagram to double-beta decay rate:

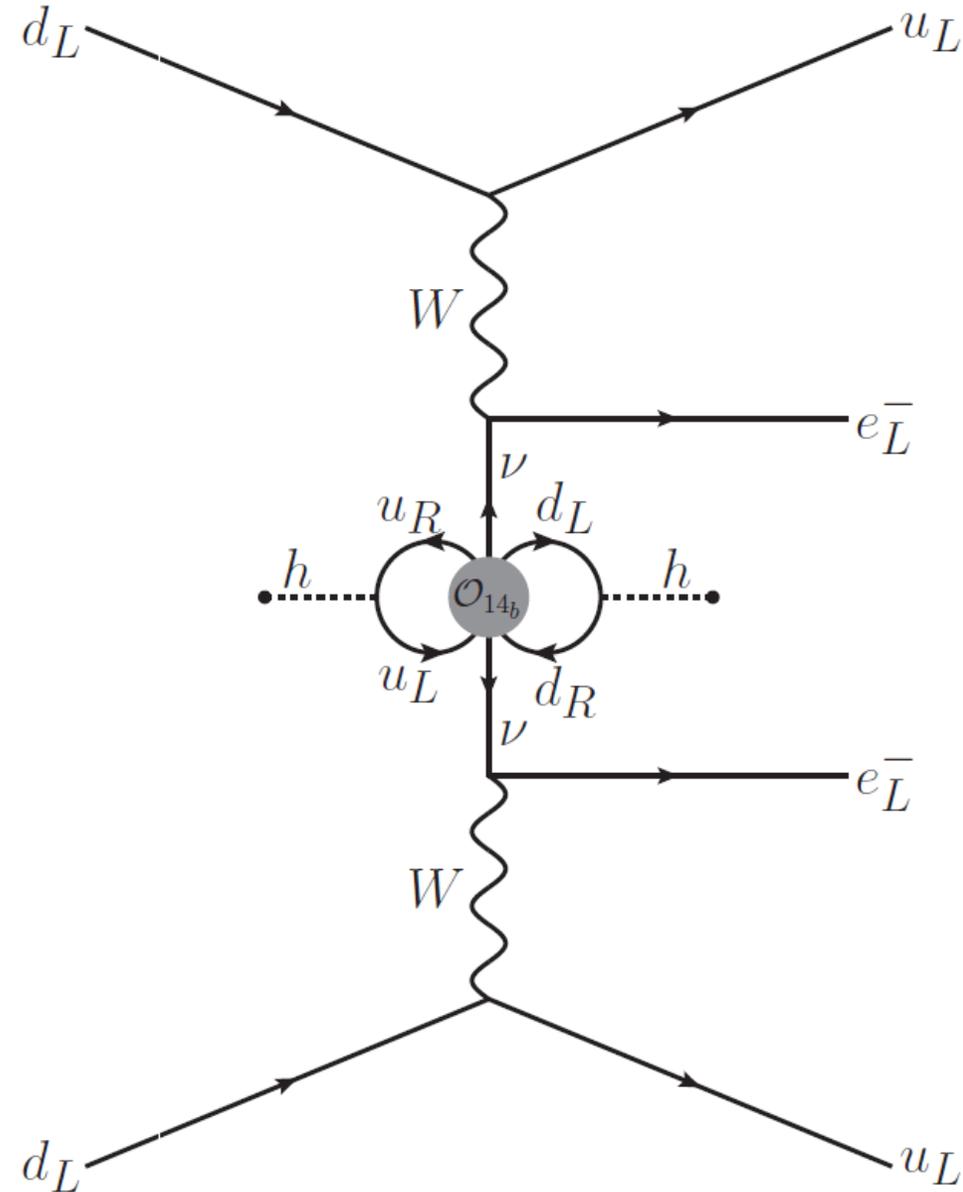

- Dimension-9 Operator: $\left(\frac{1}{\Lambda^5}\right)^2$
- 2 W-propagators: $\left(\frac{G_F}{\sqrt{2}}\right)^4$
- Neutrino propagators: $\left(\frac{1}{q^2}\right)^2$
- Two quark* Yukawa interactions: $(y_t y_b)^2$
- Two Higgs bosons acquiring their vev: $(v^2)^2$
- Two loops: $\left(\frac{\Lambda^2}{16\pi^2}\right)^4$

Contribution of this diagram to double-beta decay rate:

- **Dimension-9 Operator:** $\left(\frac{1}{\Lambda^5}\right)^2$
- **2 W-propagators:** $\left(\frac{G_F}{\sqrt{2}}\right)^4$
- **Neutrino propagators:** $\left(\frac{1}{q^2}\right)^2$
- **Two quark* Yukawa interactions:** $(y_t y_b)^2$
- **Two Higgs bosons acquiring their vev:** $(v^2)^2$
- **Two loops:** $\left(\frac{\Lambda^2}{16\pi^2}\right)^4$

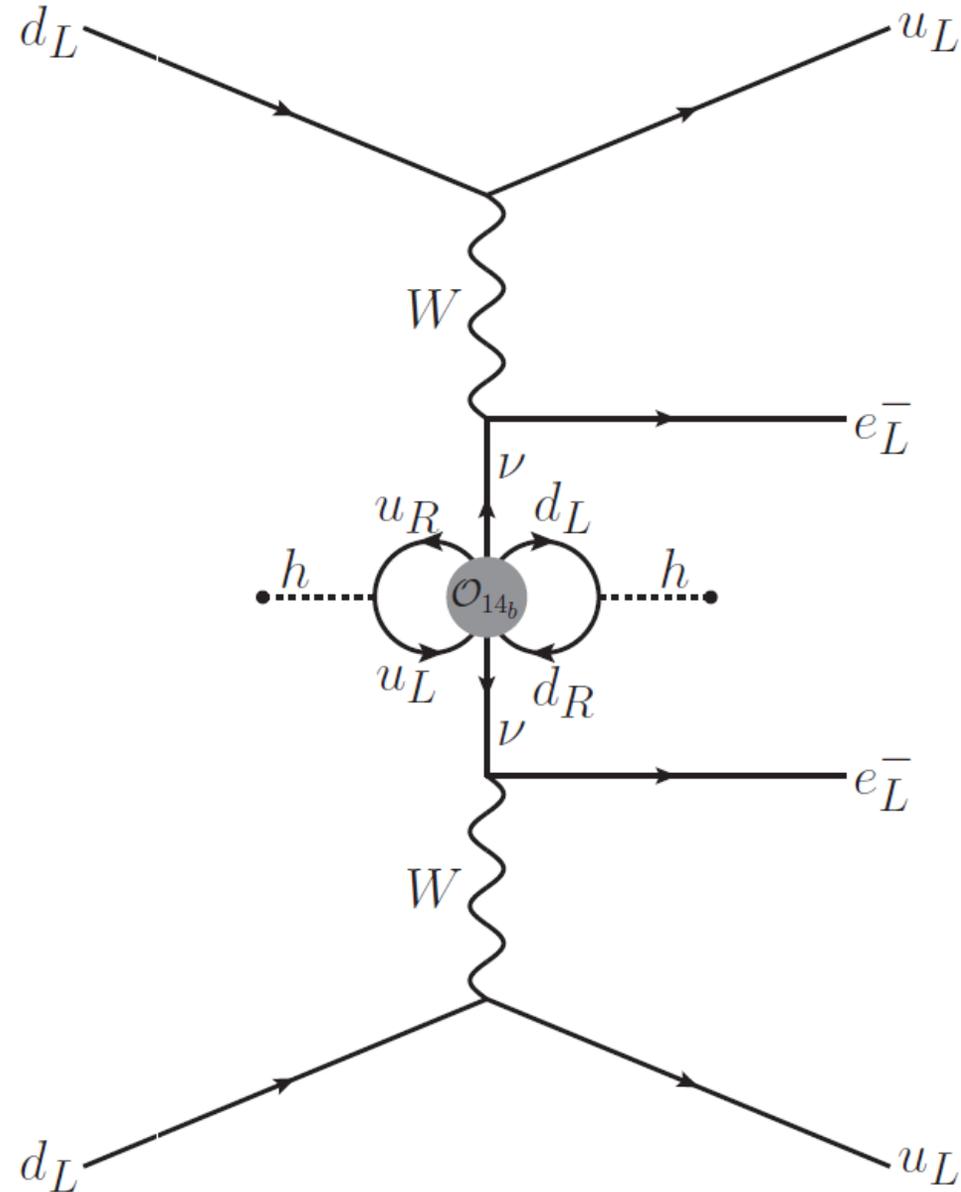

$$\Gamma_{0\nu\beta\beta}^{(2)} \simeq \left(\frac{G_F}{\sqrt{2}}\right)^4 \frac{1}{q^4} \left(\frac{y_t y_b v^2}{(16\pi^2)^2}\right)^2 \frac{?}{\Lambda^2}$$

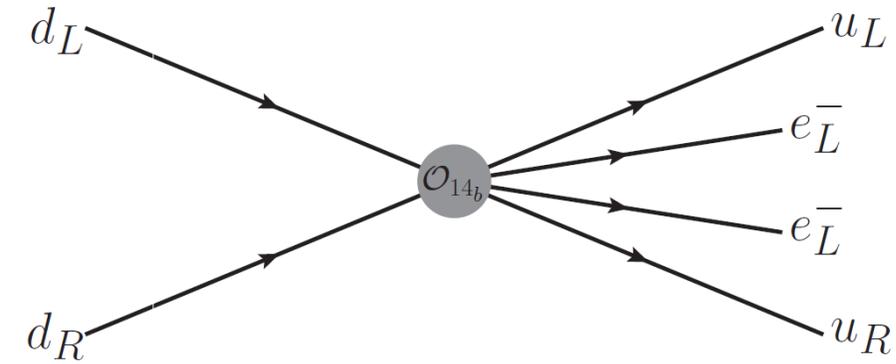

Contribution of this diagram to double-beta decay rate:

- **Dimension-9 Operator:** $\left(\frac{1}{\Lambda^5}\right)^2$
- **2 W-propagators:** $\left(\frac{G_F}{\sqrt{2}}\right)^4$
- **Neutrino propagators:** $\left(\frac{1}{q^2}\right)^2$
- **Two quark* Yukawa interactions:** $(y_t y_b)^2$
- **Two Higgs bosons acquiring their vev:** $(v^2)^2$
- **Two loops:** $\left(\frac{\Lambda^2}{16\pi^2}\right)^4$

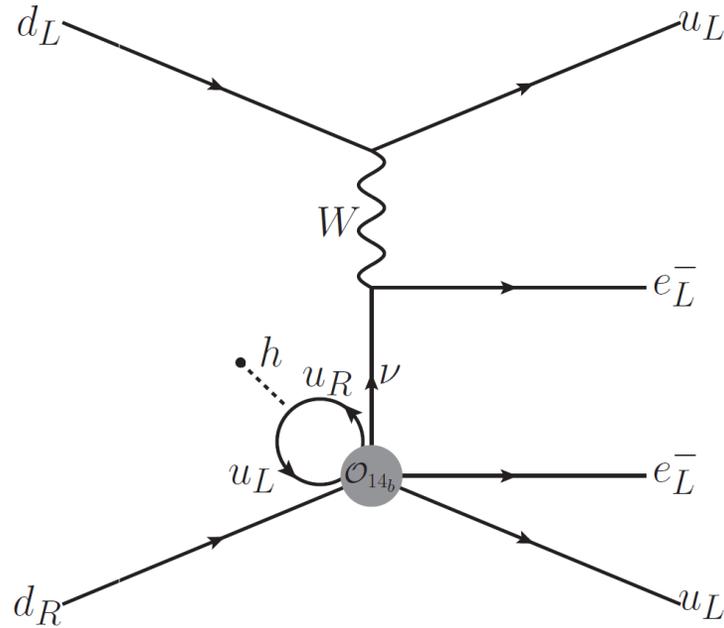

$$\Gamma_{0\nu\beta\beta}^{(2)} \simeq \left(\frac{G_F}{\sqrt{2}}\right)^4 \frac{1}{q^4} \left(\frac{y_t y_b v^2}{(16\pi^2)^2}\right)^2 \frac{Q^{11}}{\Lambda^2}$$

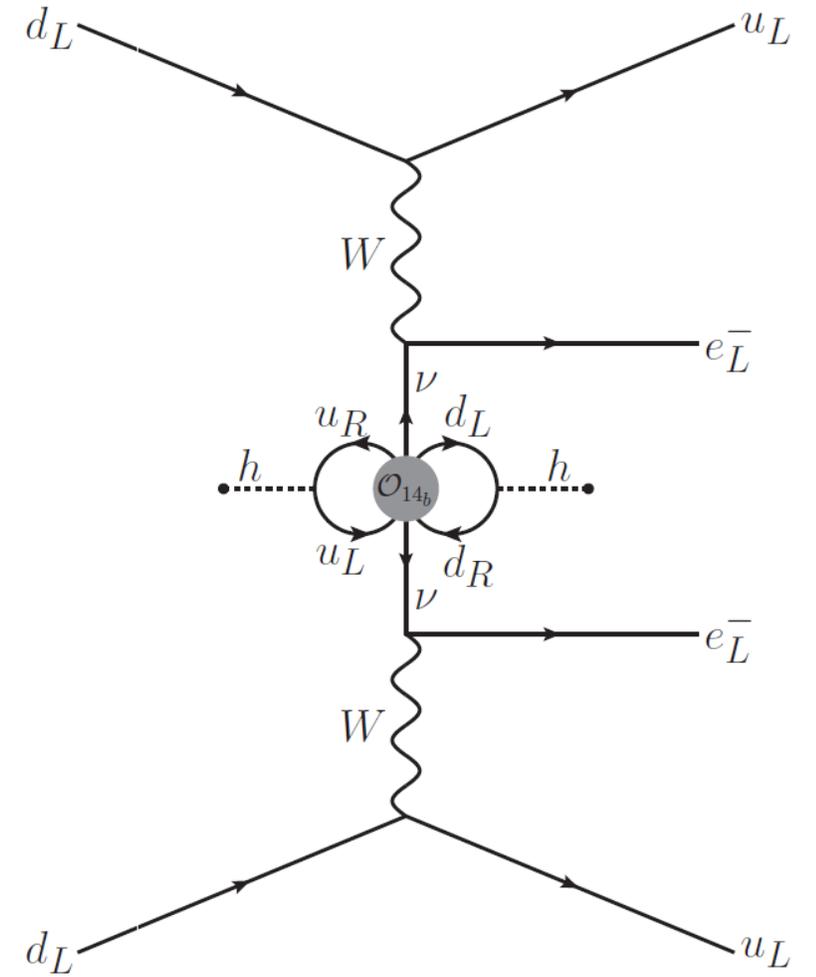

Including contributions at dimension 7 and 9:

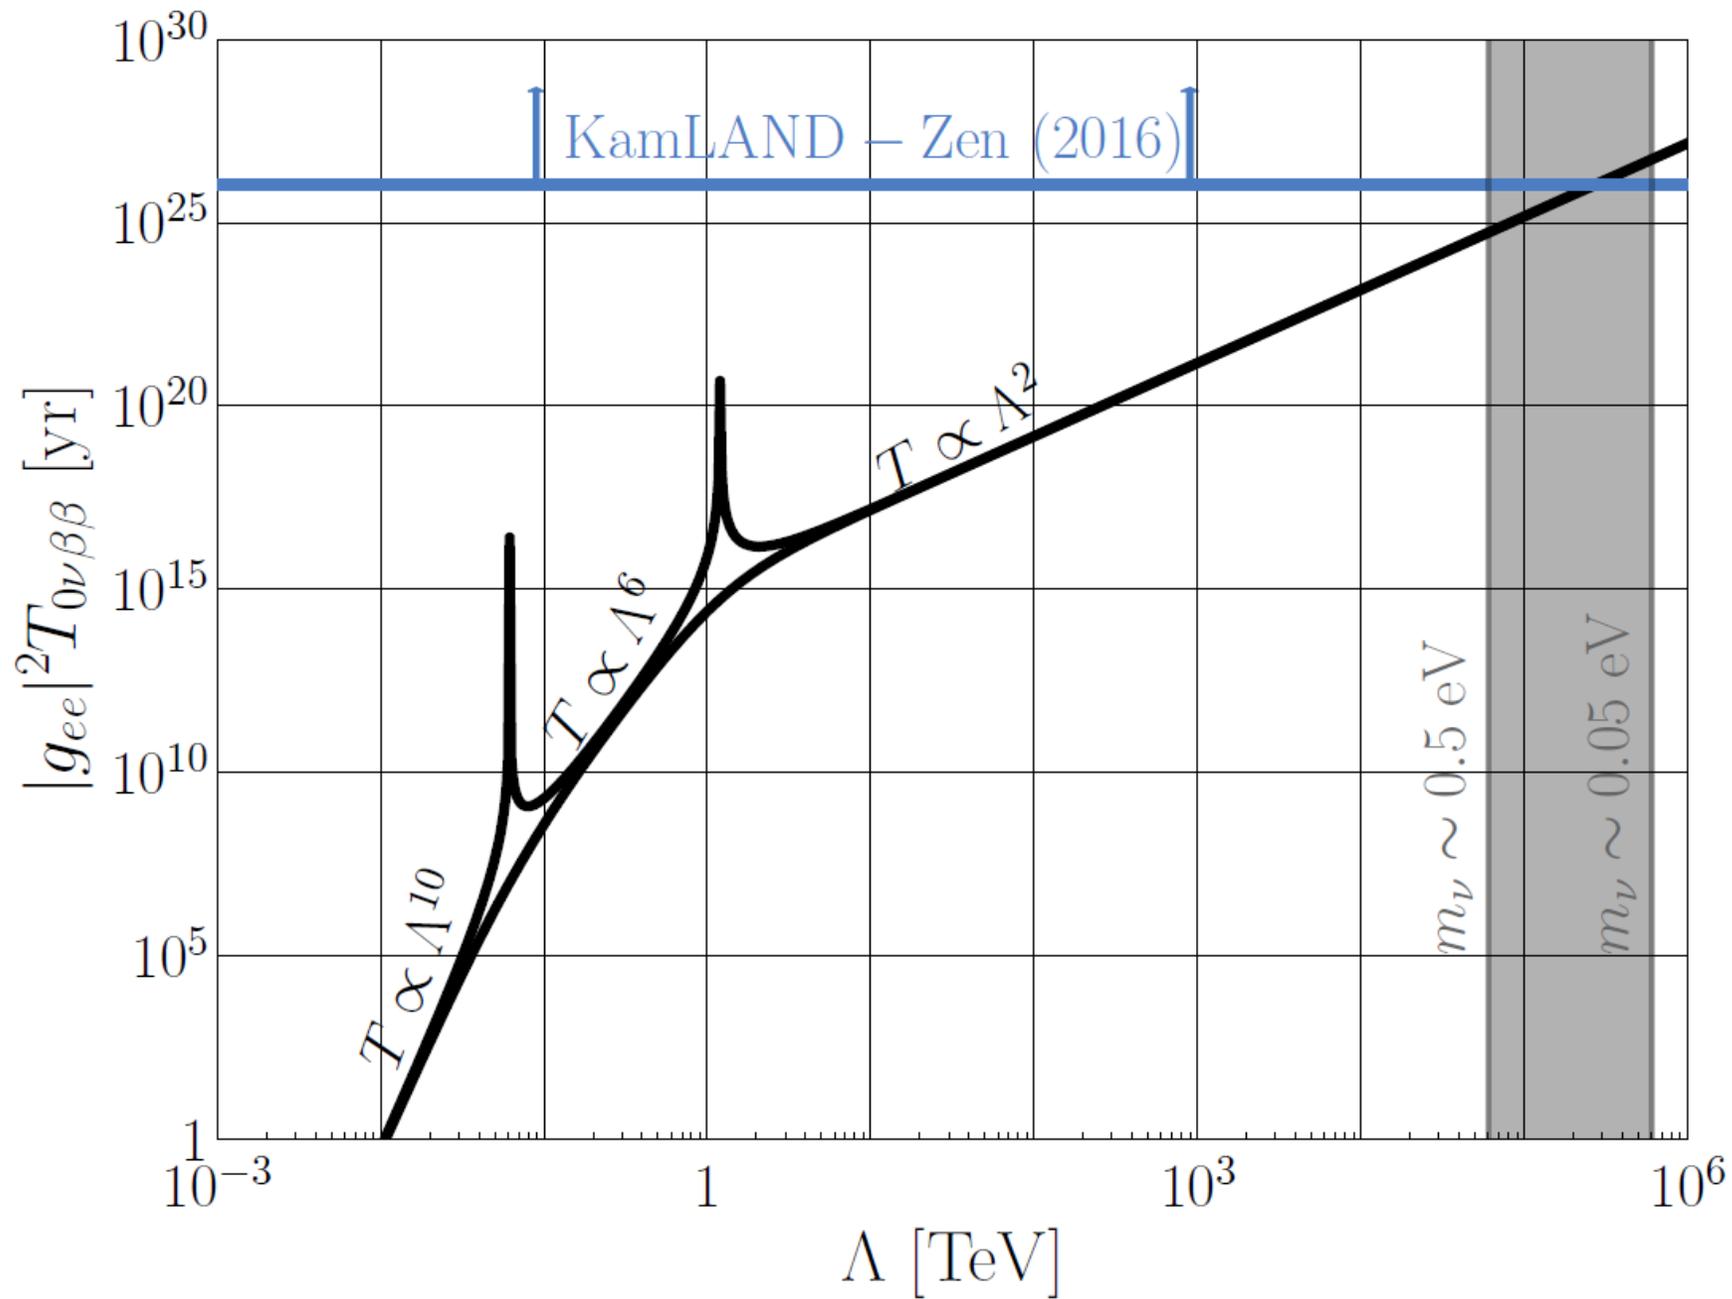

$$\Gamma_{0\nu\beta\beta}^{(0)} \simeq \frac{Q^{11}}{\Lambda^{10}}$$

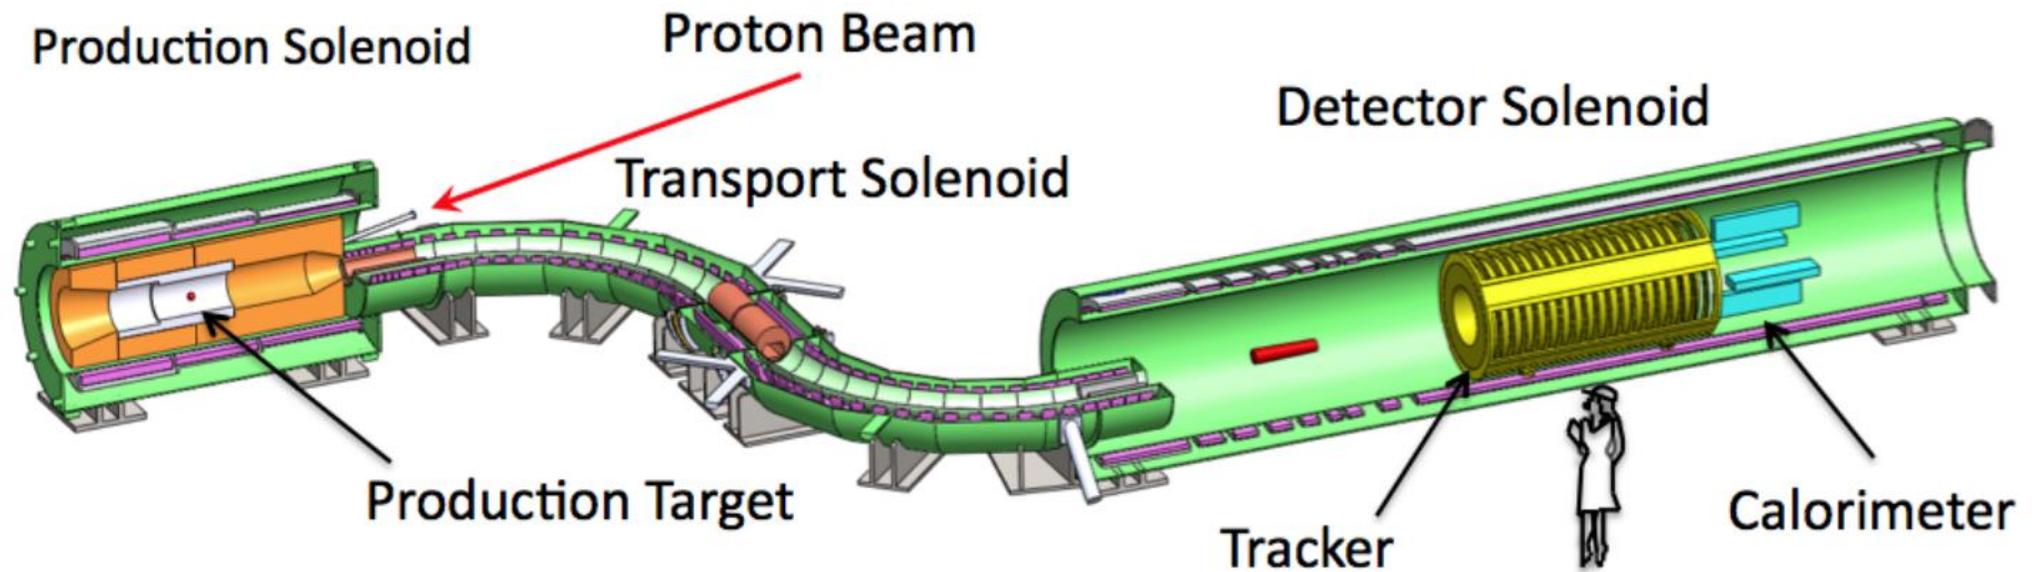

$$\Gamma_{0\nu\beta\beta}^{(1)} \simeq \left(\frac{G_F}{\sqrt{2}}\right)^2 \frac{1}{q^2} \left(\frac{y_t v}{16\pi^2}\right)^2 \frac{Q^{11}}{\Lambda^6}$$

$$\Gamma_{0\nu\beta\beta}^{(2)} \simeq \left(\frac{G_F}{\sqrt{2}}\right)^4 \frac{1}{q^4} \left(\frac{y_t y_b v^2}{(16\pi^2)^2}\right)^2 \frac{Q^{11}}{\Lambda^2}$$

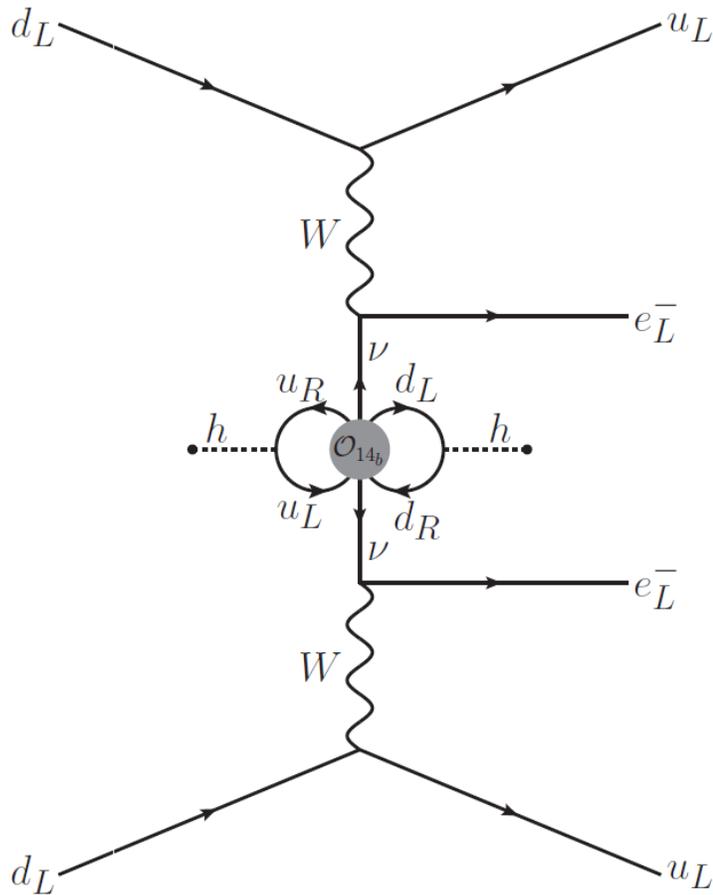

What about muon-to-positron conversion?

The Mu2e Experiment: [1211.7019]

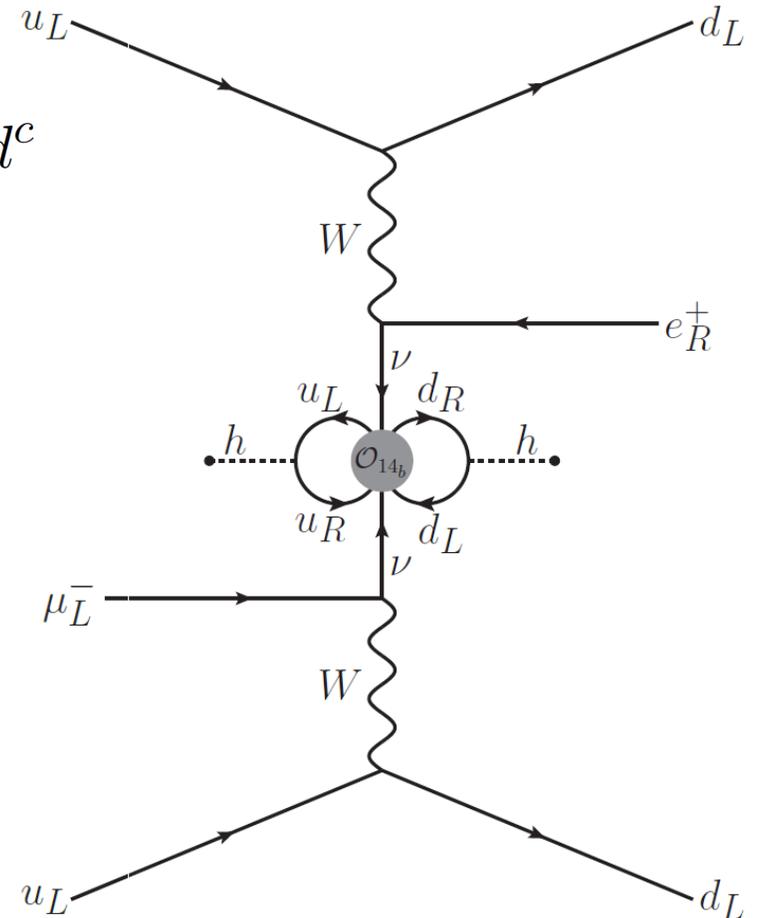

$$\text{Mu2e: } R_{\mu^- e^+}^{\text{Al}} \gtrsim 10^{-16}$$

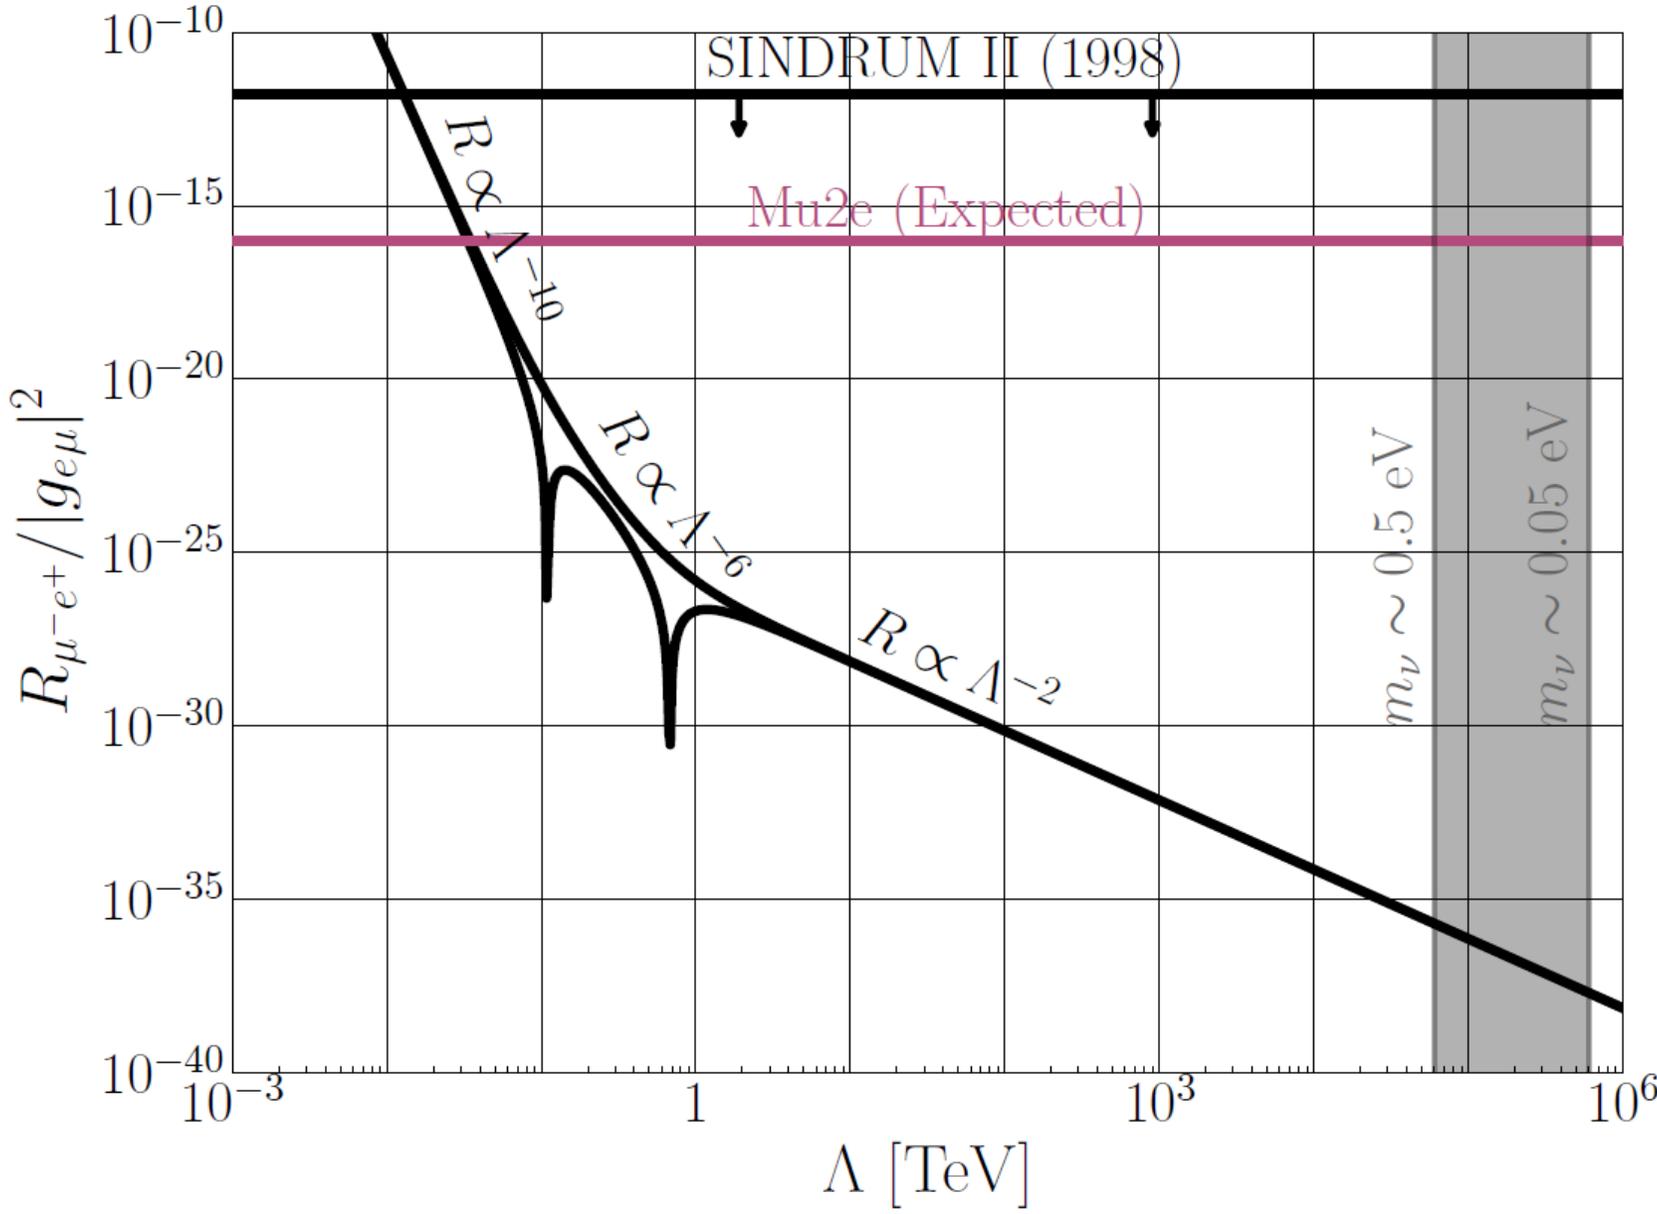

What about muon-to-positron conversion?

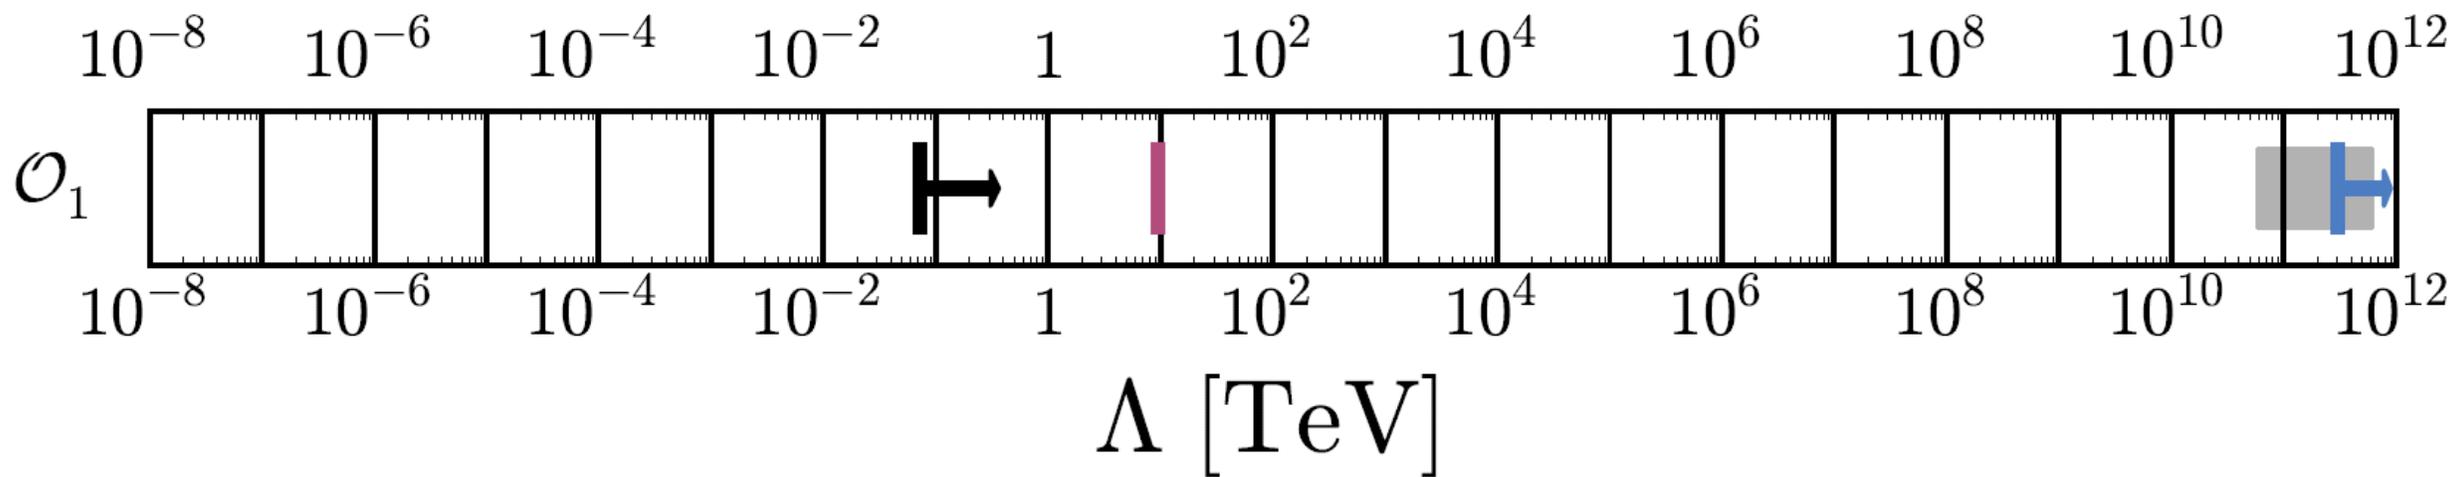

$$\mathcal{O}_{14b} = \frac{g_{\alpha\beta}}{\Lambda^5} (L_\alpha \bar{Q}) (L_\beta Q) \bar{u}^c d^c$$

$$g_{ee} \longrightarrow g_{e\mu}$$
