

eurorib'10

European Radioactive Ion Beam Conference
Lamoura, Jura, France | June 6th -11th 2010

<http://cern.ch/eurorib2010>

eurorib10@cern.ch

Topics

- At and beyond the dripline
- Shell structure far from stability
- Fusion reactions and synthesis of heavy and superheavy nuclei
- Dynamics and thermodynamics of exotic nuclear systems
- Radioactive ion beams in nuclear astrophysics
- New modes of radioactivity
- Fundamental interactions
- Applications in other fields
- Future RIB facilities
- Production and manipulation of RIB
- Working group meetings on synergies in instrumentation and data acquisition

Organized by:

CERN/HIE-ISOLDE, EURISOL, GANIL/SPIRAL2,
GSI/FAIR, LNL/SPES

Organizing committee:

Yorick Blumenfeld (CERN)
Peter Butler (University of Liverpool)
Alexander Herlert (CERN) (Scientific Secretary)
Giovanni La Rana (INFN)
Marek Lewitowicz (GANIL)
Christopher Scheidenberger (GSI)
