

Session Program

6-11 Jun 2010

eurorib'10

EURORIB 2010

Production and Manipulation of RIB

Village de Vacances de Lamoura
39310 Lamoura France

Tuesday 8 June

09:00

Production and Manipulation of RIB

Session | **Location:** Conference Hall

09:00–09:30

Production and Manipulation of Radioactive Ion Beams

Speaker

Dr Iain D. Moore

09:30–10:00

Production and manipulation of relativistic exotic nuclei

Speaker

Dr Helmut Weick

10:00–10:20

A novel method for isomeric beam production

Speaker

Dr Kieran Flanagan

10:20–10:40

The ISOLDE RILIS laser upgrade program

Speaker

Bruce Marsh

10:40–11:00

Secondary neutrons as the main source of the neutron rich fission residues production after the bombardment of a thick U target by 1 GeV protons: experimental evidences for Cs isotopes

Speaker

Anatolij Barzakh

11:00
