

WP7 schedule for individual WP meetings

(Using session numbers from the schedule)

Wednesday

Session I and II: WP7 alone. Consolidation of the outcome of plenary meetings and preparation for discussions with other WPs concerning

1. Layout and major components
2. Injectors for WP7
3. Start to end simulations of WP7 beams
4. Diagnostics and corrections for WP7
5. Requirements for lasers

Thursday

Session III: Joining WP5 session already scheduled by WP5. Discussion of details of

1. Overall layout
2. Design of beam lines

Session IV: WP7+WP4 on laser parameters from the point of view of users

1. Injector lasers; pulse energy, duration and rep rate
2. Pump lasers; pulse energy, duration and rep rate
3. Synchronization of lasers; injector and pump, probe and pump, two pumps
4. Laser lines to the experimental area

Session V: WP7: summary and preparation for Friday final presentation of the workshop outcome
