

Second Workshop on Wire Experiment for Long Range Beam-Beam Compensation

Contribution ID: 23

Type: **not specified**

Integration of Wire measurements in the MD planning

Monday 20 March 2017 12:40 (30 minutes)

- Estimate of how long it will take to get to commissioned a beam with 2 trains for 2 following scenarios: using ATS 'standard' optics as for physics, and with P1 unsqueezed
- Suggest which measurements should be done during commissioning
- Flat optics MDs and readiness.

Presenter: TOMAS GARCIA, Rogelio (CERN)

Session Classification: Machine optics and set up considerations
