

# H- $\rightarrow$ WW measurements at ATLAS and CMS

*Tuesday, 29 August 2017 11:30 (30 minutes)*

This talk will describe measurements and searches using Higgs boson decays to two W bosons at the ATLAS and CMS experiments, presenting the analysis methods and results. Emphasis will also be put on the QCD aspects that are relevant for the analyses.

**Primary author:** CMS

**Presenter:** RUSSO, Lorenzo (Universita di Siena e INFN Firenze (IT))

**Session Classification:** Higgs physics and searches
