

H->bbbar analyses at ATLAS and CMS

Monday, 28 August 2017 11:30 (30 minutes)

This talk will describe searches for Higgs bosons decaying into two b-quarks at the ATLAS and CMS experiments, presenting the analysis methods and results. Emphasis will also be put on the QCD aspects that are relevant for the analyses.

Primary author: CMS

Presenter: SHEVCHENKO, Rostyslav (Deutsches Elektronen-Synchrotron (DE))

Session Classification: Higgs physics and searches
